# **3ritain Proposes Abolition of State Dil-Trading Firm**

By Bob Hagerty nternational Herold Tribuin LONDON - The government, oving to a more free-market apoach to oil pricing, said Wednes-y that it planned legislation to tolish Britain's state-owned oilading company.

In a statement that surprised the I industry, Alick Buchanannith, the energy minister, said the gislation would call for abolish-g British National Oil Corp. lown as BNOC, and transferring me of its functions to a small

wernment agency.

The change would remove the typernment from the oil-trading isiness and presumably end offial efforts to lean against market, essure for lower prices. It is simir to a decision by Norway earlier is year to stop announcing offi-al prices for oil each quarter and stead quietly sell its oil at prices ore closely reflecting day-to-day cutations in market prices. Both countries appear eager to wer their profile and avoid

arges that they are propping up Oil traders struggled to assess the ability indications of Britain's move. On I ... h Bay Jack e New York Mercantile Extange prices of oil-futures con-acts initially dropped about 40 ats a barrel before rebounding arply. Late in the afternoon, 'est Texas intermediate crude for

pril delivery was trading at \$28.12 barrel, up from Tuesday's settle-ent price of \$27.92. West Texas termediate is the most widely aded U.S. crude, and its price ually reflects demand in the inrnational market. Britain, which is not a member of

e Organization of Petroleum Exrting Countries, has been caught "tween OPEC demands that it rein its price-stabilizing role and mands at home to end that role. The country's daily production about 2.8 million barrels of oil akes it the world's fifth-largest oducer and bigger than all OPEC embers except Saudi Arabia.

ice for British oil, usually in ugh alignment with the official

The government plans to set up months has sought a rapprochement of all and Pipelines Agency to

The government's line has been handle production agreements with at Britain follows the market in oil companies, sell the small President Amin Gemayel, a Margnite Christian canceled a trip ovement in either direction. -In recent months, however, the government pipeline system.

government has come under grow-ing pressure from both Parliament and major oil companies to take a less overt role in the market. A report from a Commons energy committee this week accused the government of "collaboration with the OPEC cartel to prop up prices. The committee argued that lower prices on balance would help the economy, notably by encouraging

ies to hire more people. We are not just sheltering under OPEC's umbrella," complained lan Lloyd, a Conservative member of Parliament. "We are supplying one of the ribs of that umbrella.

The company buys about 51 per-cent of the oil produced in the British North Sea at official prices. It then sells some of the oil back to the major oil companies and sells the rest on the open market.

Recently, it has had to find buy-ers for about 800,000 barrels a day on the open market. Most of that oil bas been sold in recent months at \$1 to \$2 below official prices. producing losses estimated at more than \$75 million over the past six months. About 80 percent of the losses are offset, however, by the tax benefits the government derives from holding official prices above the market level.

For January and February, the official price was \$28.65 a barrel, but the company sold its oil at an average price of about \$27.

Mr. Buchanan-Smith said that
British National Oil would set a As Christians Mr. Buchanan-Smith said that price for March sales but that the level had not been decided.

Justifying the turnabout in po-licy, Mr. Buchanan-Smith noted that the company traditionally has sold oil under contracts fixing the price for months at a time. With the industry's shift toward buying oil under short-term contracts, however, the company could avoid losses only by changing its prices fre-quently. Thus, he argued, British National Oil could no longer play its former stabilizing role.

But he said the government oil companies supplied enough oil

Colombia has reached a stalemate in its war on drug traffickers, whose power seems to rival the government's.

funeral of Konstantin U. Chernenko, who died Sunday.

A White House official said Mr. Reagan "was beginning to think about his legacy." The official added, "He wants to meet Gorbachev at a mutually agreed-on date; he wants to work out an accommodation on arms control."

Earlier in the day, the White House said Mr. Reagan would wel-come a meeting with Mr. Gorba-chev if it benefited "the cause of

world peace." The White House spokesman, Larry Speakes, said Mr. Reagan welcomed the tone" of Mr. Gorbachev's acceptance speech on being named party chief to succeed

Mr. Chernenko. "We're pleased he expressed a readiness, as he put it, to participate in a continuation of the process of establishing peaceful, mutually beneficial cooperation." Mr. Speakes said. He added that the 'atmospherics" between the United States and the Soviet Union had steadily improved over the last

In public and private comments White House officials made it plain Tuesday that Mr. Reagan saw the coming to power of Mr. Gorbachev, coupled with the start Tuesday of the new round of U.S.-Soviet arms talks in Geneva, as a chance to seek an early meeting with Mr. Gorbachev .

Mr. Reagan, according to White House aides, is sensitive about being the only president in more than 50 years who has not met his Soviet counterpart. Mr. Reagan has said that the constant changes of leadership in the Soviet Union in recent years had made it difficult for him to meet the Kremlin leaders. Earlier Tuesday, Mr. Reagan

said he was prepared to meet Mr. Gorbachev "whenever we can." Responding to shouted ques-

tions from reporters after a farewell ceremony for President Hosni Mubarak of Egypt, Mr. Reagan said: I've been willing to meet with their leaders since I've been here. and yes, I would look forward to a meeting with him." Asked when, Mr. Reagan said:

## **Beijing Discloses That Corruption** Has Increased Among Its Officials

By John F. Burns New York Times Service

official corruption that has swept China in recent years was partly revealed Wednesday when the Workers' Daily newspaper dis-closed that auditors had uncovered irregularities amounting to nearly 3.4-billion yuan (\$1.2 billion) in

The disclosure provided the first objective measure of the financial skulduggery that has alarmed political leaders in Beijing.

Recent speeches by Deng Xiao-ping and other Communist Party leaders have made it plain that they regard the wave of corruption among the country's nine million officials as a threat to their program of economic reform.

reflect a pattern of corruption that has long been a feature of Chinese has described it as a "new evil official life, Mr. Deng and others wind" that will overwhelm the parhave acknowledged that it has bety itself if it is not checked. come more widespread because of new policies that have relaxed contral control of economic enterprises the Hong Kong Communist week-and encouraged local initiative, ly, Ta Kung Pao. # A Town in Belgium Welcomes Missiles

#### Florennes Rejects Outside Protesters, Hopes Cruises Ignite Economic Boom

By Richard Bernstein

New York Times Service
FLORENNES, Belgium — A
weatherbeaten house of whitewashed brick just down the road from the large Belgian air base here contains a new cafe, called the Florennade, It was opened by a group of young anti-nuclear activ-ists from elsewhere in this country who hope it will become a center of local opposition to the expected installation nearby of 48 U.S.

But Florennes, an economically depressed town of 11,500 set among gentle, pastoral hills in southern Belgium, is not the kind of place where the peace movement

gets a very warm reception. It has reacted to the probable arrival of nuclear weapons with calm, with acceptance, even with signs of welcome.
"The anti-missile people say that

the population is resigned to the the town's conservative mayor, Louis Timermans, said. The truth is that they never did anything to express any ideas

"There were foreigners who came here," Mr. Timermans went on, referring to people, not just from the Netherlands and West Germany who have come to the town to take part in demonstrations, but also to Belgians coming from other parts of the country.

Recently, Mr. Timermans said, "they held a demonstration, but when they marched, the streets were empty. Nobody from Florennes was there."

In fact, on some other occasions, particularly on once-a-year, nationally organized marches that began in Florennes in 1983, as many as 12,000 people have turned up from around the country, including small numbers who came from

In addition, there is a local pacifist organization, consisting of ers have come for coffee. about 10 people - some schoolteachers, a member of a church organization working in rural areas, a conscientious objector doing alternative service in the town who organized a Committee to Safeguard the Region of Florennes. The group holds discussions and disseminates anti-nuclear pam-

In 1979 Belgium agreed to the decision of the North Atlantic Treaty Organization to base 48 ground-laumched cruise missiles in ground-laumched cruise missiles in strong memories of occupation personnel are normally stationed.

The Belgians also said, however, every six months before carrying must be kept.

engages, motioning processing to the mean of the contraction of

out the deployment, thus leaving open the possibility that the country might not proceed with the actual installation, a possibility that causes other members of the alli-

ance considerable concern. In recent weeks, Prime Minister Wilfried Martens has been presiding over meetings of government ministers to make a decision on whether to proceed now with a first deployment that, according to the NATO schedule, should begin be-fore the end of this month.

Some are said to be pressing for a postponement to give the renewed Soviet-American negotiations a chance to produce results. Others are reported to be arguing that Belgium will lose influence and credi-bility within the Western alliance if deployment does not go ahead on schedule. A decision is expected

any day.

Meanwhile, in Florennes, the place where the missiles would be placed, townspeople have shown something close to indifference, tinged with annoyance, at the efforts to turn the place into a center for anti-nuclear sentiment. The major such effort, they said, is being pressed by a group of pacifists largely from the university town of Louvain in the Flemish-speaking

It was the Flemish pacifists, for example, who recently opened the Florennade cafe just down the road

"Our main principle is just to be here," Kris van Hoeck, a member of the group said, "to be a protest against the base. We also want to create a center for people to carry out actions here. We believe only in nonviolent actions." He said there were about 30 regular members in

the anti-nuclear group.

Mr. van Hoeck said that, using a personal loan from a bank, he bought the building housing the cafe. In its first few days of operation, he said, only about 15 custom-

"The reason people here are for the base is because they make money from the presence of the Americans," Mr. van Hoeck said.

Others here agree that the influx of money from the base is a factor in local acceptance of the missiles. Florennes, which used to depend on dairy farming and steel mills in nearby cities, has seen many of the

#### **Mubarak Says** U.S. Should **Take Active Mideast Role**

WASHINGTON — President
Hosni Mubarak of Egypt said
Wednesday that those who wanted
the United States to hold back
from Middle East peace efforts
were advocating "almost a defeatiet appeach"

ist approach."
Mr. Mubarak, in a speech to members of the National Press Club, criticized the view that the parties to the Arab-Israel conflict had sole responsibility for moving the peace process forward with the United States playing only a secondary role.

Mr. Mubarak was speaking on the final day of his Washington visit during which his proposal for a more active U.S. role was received coolly by the Reagan administration.
The United States has rejected

Mr. Mubarak's proposal to receive a Jordanian-Palestinian delegation to explore peace prospects. The U.S. position is to urge direct nego-tiations between Arabs and Israe-

Mr. Mubarak said that Jordan

But he said that supporters of the view that the United States should wait and see how things developed in the Middle East were advocating inaction as a line of policy.

He said the argument that responsibility for moving the peace process forward fell squarely and solely on the parties to the conflict inferred that the United States could play only a secondary role.

But Mr. Mubarak said: "You cannot say, 'I am waiting until the The three gunmen then blew the parties agree on everything before I mbassy door off its hinges with step in. The role of a great country like the United States is not simply to endorse what was agreed upon. Rather, it is to help the parties

to make independent decisions and

WORLD BRIEFS

Czechoslovak Police Raid Film Show

PRAGUE (AFP) — Two of the three spokesmen of the Czechoslovak human rights group, Charter 77, and nine other persons have been arrested at a private film show in Prague, it was disclosed here Wednesday.

day.

In a letter of protest to President Gustav Husak, the third spokesman, Petruska Sustrova, named her two arrested colleagues as a writer, Eva Kanturkova, and a former journalist, Jiri Dienstbier, who rents the house in Prague where the screening was taking place. Also arrested were a writer, Petr Kabes, and a former police colonel, Oldrich Hromadko, who was dismissed from the police for signing Charter 77.

The arrests occurred when police raided the house Monday evening, taking away all 48 people present. Of those, 37 were released after five hours of interrogation, according to a letter received by Agence France-Presse.

#### New Grand Jury to Investigate Goetz

Mr. Mubarak said that Jordan and the Palestine Liberation Organization had made a firm commitment to a peaceful solution of the conflict that would lead to direct negotiations with Israel.

But he said that supporters of the view that the United States should seed to direct that would lead to direct negotiations with Israel.

But he said that supporters of the view that the United States should seed a judicial order for a new grand jury only if evidence is found that was not available to the first errord jury.

was not available to the first grand jury.

Mr. Goetz, a 37-year-old engineer, was indicted by a Manhattan grand jury in January for illegal possession of guns, including one that he used in the shootings. The grand jury declined to indict him for attempted murder in the shootings, which Mr. Goetz said stemmed from a robbery attempt by the four teen-agers.

#### West Europe Group To Meet in April

LONDON (Reuters) - Defense and foreign ministers of the Western European Union, a seven-country group being revived after long inactivity, will discuss defense and East-West issues in Bonn on April 22-23,

nroes in the organization said Wednesday.

Members of the Western European Union are Belgium, Britain, France, Italy, Luxembourg, the Netherlands and West Germany. They decided last year that the 30-year-old organization should play a more active role as a "European pillar" of the Atlantic Alliance.

#### Gorbachev Is Invited to Visit the U.S. Suspect's Son Testifies in Aquino Case Christians

MANILA (AP) - The 11-year-old son of Rolando Galman, the man Split in Beirut killed with Benigno S. Aquino Jr., the opposition leader, said Wednesday in court that he has not seen his mother, Lina Galman, for more than a year. The family's lawyer said that she, too, may have been killed. (Continued from Page 1) General Fabian C. Ver, commander of the armed forces, and 25 other tia was reassuming its "prerogative

persons are on trial for the two murders. The military has claimed Mr. Galman's was Mr. Aquino's assassin. Mr. Galman's son, Reynaldo, broke into tears in court and said he has not seen his mother since Jan. 29, 1984, when four men took her from his

home. Their lawyer, Lupino Lazaro, said Lina Galman may have been killed because she knew too much.

# Extreme Right EC Fails to Agree On Farm Prices French Races

PARIS - Jean-Marie Le Pen said Wednesday that candidates of his extreme-right National Front favor of better-placed opposition candidates in the second round of local elections this Sunday.

Mr. Le Pen had said earlier that he would tell his candidates to stay in the race, after the major conservative opposition parties, led by Jacques Chirac, the mayor of Paris, and former President Valery Giscard d'Estaing, refused an alliance with his National Front for the runoff. His reversal on Wednesday took the other parties by surprise.

Although leaders of the conser-

vative parties had rebuffed Mr. Le

If Mr. Le Pen had kept all his candidates in the field, dividing the parties of the right, Socialist and Communist candidates would have stood better chances of taking office in some close races. The vote is seen as the last na-

tionwide political test before legis-lative elections in 1986, and thus a gauge of whether the Socialists will be able to stay in power. that the panel was at an impasse after rejecting most of Mr. Rea-

In the first round of voting March 10, the right won almost 58 percent, the left, 41 percent. President François Mitterrand's Socialists got only 25 percent.

Quits Some But Approves Modernization Plan

Compiled by Our Staff From Dispatches BRUSSELS - Agriculture ministers of the European Community failed to agree on prices for EC farm products in two days of talks

that ended early Wednesday. The failure set the stage once again for intensive price bargaining before the 1985 farm marketing

year begins April 1. However, officials said the ministers approved a five-year farm modernization program that would cost 5.25 billion European Currency Units (\$3.5 billion).

The program will upgrade the poorest farms throughout the 10nation community.

A negotiating session has been scheduled from March 25 to 27 to reach an accord on the issue of

The EC's Executive Commission has proposed a general freeze on farm prices to control spending on price supports and reduce the com-munity's budget deficit. bodyguards. The two were sen-

The disagreements among the EC governments about the new prices are not unlike those in previous years. The annual price setting exercise usually gets nowhere at regular meetings of the agriculture ministers but is solved in round-the-clock bargaining at EC head-quarters just before each new mar-

keting year. The commission's proposal to freeze prices is opposed by most EC nations. Only the Netherlands, Britain, Denmark and France generally support the commission's

Among opponents of the freeze are West Germany, Italy and

level of common EC prices.

#### 2 Get Life Terms in Germany For Killing of Schleyer in '77

DUSSELDORF --- A West German court convicted two members of the leftist terrorist Red Army Faction on Wednesday of murder ing the head of a German industrialists' ogranization and his four

tenced to life imprisonment.

Adelheid Schulz, 30, and Rolf-Clemens Wagner, 40, were found guilty of the 1977 kidnapping and murder of Hanns-Martin Schleyer, president of the Federal Associa-tion of German Employers. The four bodyguards were shot to death during the kidnapping on a Co-logne street Sept. 5, 1977. Mr. Schleyer's body was found 43 days later in the trunk of a car in Mul-

house, France. The Düsseldorf state court also convicted Miss Schulz of involve-ment in the July 30, 1977, murder of the Dresdner Bank chairman,

Jürgen Ponto, who was shot at his home in Oberursel, near Frankfurt. The court sentenced Miss Schulz to three terms of life in prison. while Mr. Wagner was sentenced to two terms of life in prison. Their sentences could be reviewed for parole after they have served 15 years.

Prosecutors said the Schleyer kidnapping was part of a plot to force the West German government to release convicted members of the Red Army Faction, including its leaders, Andreas Baader, Gudrun Easslin and Jan-Carl

After the government refused to accept the demands, Mr. Baader, Miss Ennslin and Mr. Raspe died in their prison cells in Stuttgart and another gang member, Ingrid Schubert, died in a Munich prison. Authorities said that the four had committed suicide.

#### SAUDI ARABIA NATIONAL GUARD An invitation for Qualification in Communication Systems.

The Saudi Arabia National Guard is implementing continuous operations for the modernisation and development of its Nationwide Communications System.

In order to determine companies and corporations of international repute capable of constructing and modernising the communications systems, it invites such organisations to submit details describing their capabilities.

So that the qualification process is carried out correctly, it is necessary to submit the following information:

 Registered name and address of company, history, management structure and organisation, scope of products and services currently provided.

2. Summary of relevant contracts with brief details of product or system installed together with name and location of purchasing administration.

3. Registration authority and standard to which quality assurance organisation complies viz NATO AQAP 1, 4 or 9, United Kingdom DEF STAN 05-21, 24 or 29, USA MIL-Q-9858 or MIL-I-45208 or National Equivalents.

4. Statement showing the financial position of the company.

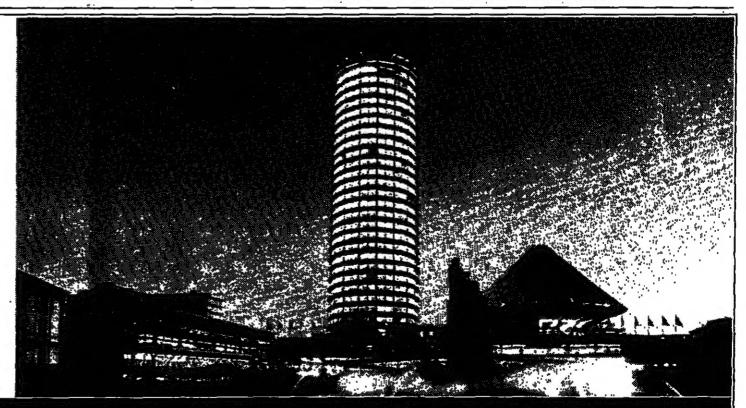

All information will be treated in the strictest confidence. Information and support documentation to be submitted to the following address: Director of Signals, Headquarters National Guard, Khurais Road, Riyadh, Kingdom of Saudi Arabia

For the Kenvatta Conference Centre in Nairobi, Karl Henrik Nostvik was asked to design a complex which would echo the spirit of the African people, and also (because of high volcanic activity) meet the earthquake requirements laid down in California - the strictest in the world.

The centre consists of a circular amphitheatre—inspired by traditional African houses - a plenary hall - for up to 4000 delegates - and a 24-storey tower block. For the lighting, we basically applied fluorescent lamps throughout, diffused by wooden louvres, made of local timber.

We have also been requested to redesign and install the sound equipment, including separate multi-lingual conference and interpretation systems for the Plenary Hall, the Amphitheatre and other

In Munich, the Hypo-Haus, head-office for the Bayerische Hypotheken- und Wechsel-Bank, was designed by Walther and Bea Betz.

# The Kenyatta Centre in Nairobi and the Hypo-Haus in Munich - two landmarks to our expertise.

The building - prism-shaped structures suspended between four cylindrical shafts - is a striking landmark.

The lighting and air-conditioning for this 26-storey office building demanded extensive discussions and month-long laboratory measurements. The result was the design and installation of some 7000 tailormade air-handling louvred luminaires, for the integrated lighting and air-conditioning system.

An additional problem was that the height of the luminaires was restricted to just 85 mm. Other landmarks to our expertise include Singapore's Raffles City project, the Palais des Festivals in Cannes, and the Banco Central in Ecuador. For more information, write to the Philips organization in your country, or to Philips C.P.M.S., VOA-0217/IHA16, Eindhoven, the Netherlands.

Philips. The sure sign of expertise world-wide.

## Beijing Aide Sent to Rite In Moscow Is Viewed As New Breed of Leader

By Daniel Southerland Washington Post Service

BELJING - China's decision to send Deputy Prime Minister Li Peng to the funeral of the Soviet leader, Konstantin U. Chernenko, appears to reflect efforts by Beijing to groom a new generation of leaders at a time when Moscow is making a generational transition of its

Li Peng, 56, will be the first Chinese official to meet with Mikhail S. Gorbachev, 54, the new Soviet

Mr. Li is a technocrat typical of a new breed of Chinese leaders. He is the type of administrator on whom China's aging leaders appear to be counting to make their economic modernization program succeed. Diplomats view him as a possible candidate someday for one of the highest posts.

As China's leading nuclear power expert, Mr. Li is known for his professional and administrative competence. Unlike some of the nation's older revolutionary leaders who gained their credentials through military or ideological struggles, Mr. Li was trained as an electrical engineer and rose through a succession of technical and administrative posts to reach his current position in 1983.

Diplomats speculate that by sending Mr. Li to Moscow, the Chinese can make a serious offer to further improve relations with the Russians while at the same time not appearing to be too eager.
The Chinese could have sent

#### 1983 Crash in Madrid Blamed on Pilot Error

Agence France-Presse
MADRID — Pilot error led to the loss of 181 lives when a Colombian Boeing-747 jet crashed near Madrid on Nov. 27, 1983, accord-

ing to an official report.

The pilot, Julio Hernandez, had lost his position and came in too low on his approach to Madrid's Barajas airport, according to a re-port published Tuesday by the Spanish Air Safety Commission. He ignored an alarm warning

him to gain beight, telling the de-vice to "shut up," the report said. The inquiry based part of its findings on examination of the in-flight recorder.

But primitive people, many of whom re was still no organized system are illiterate in their own language,

for taking them to Israel. Then in early 1984, 12,000 to a modern society such as Israel walked en masse to Sudan in what whether to bring them to Israel in Mr. Berger described as a "purely one big airlift or in small numbers spontaneous movement," creating over a long period to allow Israel enormous pressure on Israel for acand the Ethiopian Jews to adjust.

In October 1984, the association gradual process of bringing them an advertisements in 32 Jewish in. They didn't realize the dimenran advertisements in 32 Jewish newspapers around the the United sions of the problem," Mr. Berger States saying that 2,000 Ethiopian said "Their view was it couldn't be Jews had died in terrible conditions done massively."

The accounts nonetheless make they always do when they deciclear that the Israeli government periodically reacted to pressure and undertook limited rescue attempts. One came in August 1977 when 62 Ethiopian Jews were smuggled aboard a plane bringing aircraft spare parts to Addis Aba-

An Israeli with an elderly Ethiopian Jew who arrived at Ashkelon, Israel, on the airli

ba. Ethiopia.
Two others occurred in mid-1980 and again in mid-1982 when the Israeli Navy took hundreds of Ethiopian Jews to Israel from an obscure Red Sea port in Sudan in small ships and submarines.

Despite a ruling by the chief Se-phardic and Ashkenazic rabbis in 1975 that the Ethiopian Jews were lews and thus subject to the Law of Return, the Israeli political establishment "dragged its feet" for nine years on organizing a rescue opera-tion, according to Mr. Berger. The law grants Israeli citizenship to any Jew who immigrates to Israel.

A former president of the association, Howard Lenhoff, wrote in an internal memorandum dated Sept. 17, 1980, that on the issue of Ethiopian Jews "we are dealing with the The ambiguity also is reflected most devious and inept elements in the Israeli bureaucracy and with the most naive, ill-informed and overcautious elements of world Jewish leadership."

The association organized demonstrations in Jerusalem and Tel Aviv, lecture tours for Ethiopian Jews in the United States and publicity campaigns through ads and stories in Jewish newspapers.

Other sources said that plans for the airlift were discussed by the Israeli government last summer, however, suggesting that it had its own reasons for deciding to act.

act," Mr. Berger said, referris the secret Israeli airlift that b in late November through Em an airports.

According to association cials and at least one Ethic involved, one of the biggest of cles to a mass rescue operation a top official in the Jewish Ap Yehuda Dominitz, who had closed the arrival of Ethic

# Russia, Intelsat Work on Agreement That May Lead to Soviet Membership

By Susan F. Rasky

New York Times Service WASHINGTON - The Soviet Union and Intelsat, the international satellite communications consortium, have reached a tentative information-exchange agree-ment that is expected to lead to Soviet membership in the consortium, according to an Intelsat offi-

Joseph N. Pelton, director of strategic policy for the 109-country consortium, said Tuesday that the agreement was worked out in Moscow two weeks ago during a visit there by Intelsat's executive director, Richard R. Colino.

Mr. Pelton said that the agreement was awaiting the signature of Vasily A. Shamshin, the Soviet minister of posts and telecommunications, and that formal approval was expected soon, perhaps by the end of the week.

Intelsat, a nonprofit cooperative open to all countries, provides twothirds of the world's telephone service, almost all international television transmission, most telex service and many kinds of data satellites. transmission. It was established in 1964 and is based in Washington.

The consortium's members include Yugoslavia, Vietnam, China and Nicaragua. The Soviet Union is a customer of the system, and as such is entitled to attend meetings given information from technical, arranged to receive a transmission ders,

planning and board meetings that is available to full members.

The United States has no authority to prevent the Soviet Union from joining or to restrict the flow of Intelsat technical information to Moscow. But Intelsat officials ac-knowledged that the U.S. Defense, Commerce and State Departments might have concerns about the transfer of American high-technology equipment or information to the Soviet Union.

Mr. Pelton said that the Soviet Union had expressed interest in be-coming more involved in Intelsat at various times over the last two decades, but that it appeared to have begun serious consideration during the 1980 Olympics in Moscow.

They began paying very serious attention to Intelsat when they found they had to come to us to obtain global coverage for the Games," Mr. Pelton said. Since the mid-1970s the Soviet

Union has maintained its own satellite system. Intersputnik, through which Eastern bloc countries can lease capacity on Soviet-operated Industry sources suggested that the long-term Soviet goal might be

teisat systems. In recent years, Moscow has atis a customer of the system, and as such is entitled to attend meetings where traffic and frequency infor-arranging attractive terms. In 1984, mation is discussed. But it is not for example, Cable News Network in Istanbul were suspected of mur-

## Cleaning Out the Stables

. The decision by President Reagan to stop limiting imports of cars from Japan should occasion mild rejoicing. For four years a professedly liberal administration prevented Americans from buying all the Japanese automobiles they would have liked, and by so doing raised prices in America and profits in Japan. Have we now started to cleanse the Augean stables of protectionism? Up to a point. But there remains a smell.

Lifting the restrictions leaves Japan still aware that if its producers take full advantage of their new freedom, some sort of control is likely to be reimposed. Big Brother is still watching. More complex, but again unfavorable to free trade in cars, is the probability that the more Japan's automakers take advantage of their new freedom, the heavier will be Washington's pressure on Tokyo to allow American industry to compete freely on the Japanese market in a wide range of manufactures, of which telecommunications is perhaps the foremost. So Japan, less than pure when it comes to exposing its own new industries to competition, is tempted still to restrain car exports to keep out American high-tech produce; car sales have to be sacrificed to help protect other Japanese industries. Mr. Reagan's long-sought lifting of auto controls may make Tokyo recall a Chinese proverb: Be careful what you ask for - you might get it.

In a larger sense, we cannot blame Washington and Detroit, nor Tokyo, for the perpetual straitiacket around international trade in cars. The real Augean stables are in Europe. While America limited Japanese cars to some 20 percent of its market in recent years, most European countries were — and remain — far meaner. The only Common Market country which allows unimpeded entry of Japanese cars is West

Germany. It believes that its own producers are efficient enough to stand up to the challenge - which probably raises West German efficiency. France and Italy limit Japanese cars to under 2 percent of their market. How could America be expected genuinely to open its borders to the Japanese without let or hindrance, when Europe does not? It would be swamped by Japanese exporters with no other place to go.

Even inside Europe, the car trade is far from free. Identical models sell for very different prices in different countries. Consumers are thwarted by industry at every turn when they try to buy from the cheapest suppliers, and have not yet seen their rights defended strongly by the EC authorities. There is now a further threat, stemming from West Germany's desire to run ahead of its European partners on pollution control. Given the havor that exhaust fumes are wreaking on the Black Forest, one can understand the German pressure to get something done quickly. But unilateral action on emission standards risks blumting—to West Germany's advantage — the free competi-tion that Bonn has long supported. Other European governments are moving regrettably slowly toward adequate environmental safeguards, but Bonn is not all that blameless. It could reduce pollution - and accidents - by imposing a speed limit. Unfortunately, German voters like to drive fast.

If all goes well - which is not certain there will be negotiations in GATT next year to reduce the general obstacles to world trade. But the negotiations will be lengthy, and their effects will not be felt much before the end of the decade. Why not a quick miniround to straighten out trade in particular sectors, starting with automobiles?

INTERNATIONAL HERALD TRIBUNE

#### The Greeks Have a Point

Andreas Papandreou in Greece? He is capable of the most blatant anti-Americanism and anti-Westernism; he attacks Solidarity and charges the United States with "expansionism and domination." True, he has been careful to maintain structural links with NATO, renewing American base leases and undertaking to buy aircraft that will tie Greece to American suppliers until the end of the century. Yet there is an unsettling erraticism in Greek policy under Mr. Papandreou, a hint that he might lurch far left past a point of no return.

His latest act, an internal one, ordinarily would not draw foreign attention. It is so typical and disturbing, however, that it has been widely noted. Mr. Papandreou had promised to support parliament's re-election of Constantine Karamanlis, the conservative elder statesman known for his emphasis on keeping close ties with the West. The prime minister stunned his countrymen, however, by dumping Mr. Karamanlis. The president now due to be chosen, being beholden to the left, will not easily be able to perform Mr. Kara-

manlis's balancing role, even if he chooses.

This is no small matter. Mr. Papandreou's PASOK movement is heavy on Marxist and Third World slogans and heavily influenced by the Communists. By his overt anti-Americanthe Communists. By his overt anti-Americanthe Communists. By his overt anti-Americanism, some say, he buys political room for the

vital for Greece to defend itself against its NATO partner and regional rival, Turkey, and for general reassurance in a corner of the world where Soviet power is strong. But this is an inherently unstable arrangement. A respected Greek analyst, Panayote Dimitras, using Warsaw Panayote in an article in Foreign Policy magazine, fears that "NATO's Romania" may become "NATO's Yugoslavia"— a

reference to Belgrade's break with the Pact.
So the United States has reason to be concerned about Greek policy. But it also has reason to be concerned about U.S. policy. The question that too few Americans ask is how a friendly democratic country such as Greece, which fought with America against fascism and which America then helped save from communism, came to its present confusion.

The key part of the answer is that Washington carelessly aggravated the fears and frustra-tions of Greeks of all parties by appearing too friendly to the colonels who ruled from 1967 to 1974 and to the Turks who invaded Cyprus in 1974 and hold part of it to this day. Nobody ever said the Greeks were easy to get along with. But they have the leadership of their

- THE WASHINGTON POST.

#### **Doctors and the Courts**

The number of medical malpractice suits filed in America and the size of the jury awards are not of interest to doctors only. The cost, in terms of extremely high insurance premiums and the practice of expensive "defensive medicine" designed to avoid suits, is passed on to patients and taxpayers. Some physicians in high-risk specialties and in certain areas of the country pay as much as \$80,000 a year in malpractice premiums. Still, insurers report, they pay out more in claims under these poli-cies than they collect in premiums.

Last month a task force of the American Medical Association issued recommendations for addressing the malpractice problem. Public education and quality control within the medical profession were stressed. So was the need for tort reform — the revision of laws and procedures governing negligence litigation — to make the resolution of these cases faster, less burdensome and fairer to all the litigants.

In the mid-70s, when insurers first balked at providing this coverage, most states enacted some kind of tort reform, but many of these state laws are still being tested in the courts. In

California, a leading state in terms of volume of suits and the sweeping nature of the reform, the constitutionality of the statute was re-solved piecemeal, with the final state Supreme

Court judgment handed down last Thursday. The California law has three major provisions: Attorneys' fees in medical malpractice cases must be based on a sliding scale from 40 percent of the first \$50,000 recovered down to 10 percent for awards over \$200,000. Payments are made over the lifetime of the plaintiff, instead of in a lump sum, and cease when he dies. And recoveries for pain and suffering cannot exceed \$250,000. Other states have adopted similar, although generally less stringent, forms of these controls, and encouraged arbitration and the revision of statutes of limitations and rules of evidence. California will be the state to watch. Its reforms have been upheld by the highest court of the state, and they are major changes. If, over the next few years, they facilitate settlements, reduce litigation and stabilize insurance premiums, they will provide an effective model for other states.

-THE WASHINGTON POST.

#### FROM OUR MARCH 14 PAGES, 75 AND 50 YEARS AGO

1910: British Railways Bank on Coal LONDON — Compared with previous weeks, the market in British railway shares has been a centre of some interest. To begin with, there was the setback caused by the fear of a great coal strike in South Wales, but later there came a fairly good recovery, taking into consideration the fact that the state of the coal trade is so unsatisfactory and that there still remains the danger of a big strike. However, as none of the matters at issue is of such a nature as to make a strike necessary, and as a satisfactory settlement may reasonably be expected, it is pretty generally agreed that, trouble out of the way, everything points to an im-provement in the British railway market.

1935: Frenchmen Try American Jazz PARIS - American jazz, born on the Mississippi, reared in the Southland and sent to finishing school in New York, where it got smooth and sophisticated under the tutelage of George Gershwin, has come into its own in Paris. Paris has had jazz for a long time but until recently it was just a kind of haze in the wake of American tourists. Frenchmen neither tried nor desired to understand it and the very suggestion that a Frenchman was going to play a saxophone was enough to make a man rise and depart for a more peaceful locale. Wander around the night clubs of Paris and where you found all-American bands four years ago,

French bands hold forth, and not bad either.

# Four Sandinist Reasons for Washington to Let Up

N EW YORK — President Reagan asks the people of the United States and the U.S. Congress to continue financing the CIA's covert war against Nicaragua. He says his aim is to bring about a "restructuration" of the properties. ing" of our government. Here are four reasons why the American peo-

ple should refuse to comply.

Firstly, the covert war is illegal.

The World Court, on May 10, 1984, ordered the United States to stop its aggression. It cited the charters of the United Nations and Organization of American States, which prohibit the use of force against the territorial integrity and political independence of another nation. The U.S. administration walked out of the court.

The war cannot be justified as "self-defense." The Reagan administration now admits that its purpose is to overthrow our government — not, as Congress and the American people were told, to interdict an alleged flow of arms to Salvadoran rebels. Even while it maintained this pretense, the White House never produced real evidence of an arms flow - because it does not exist. The U.S. administration knows this: If it had evidence of arms trafficking, it would have tried to prove it in the World Court.

Why care about international law? Because disrespect for law breeds chaos. When a powerful nation repudiates international law - and its highest symbol, the World Court -it threatens the entire legal order and

sets a dangerous precedent.

The second reason is that the covert war is immoral. This war is directed against Nicaragnan civilians, not our military. The "contras" pene-trate our territory from bases in Hon-duras and Costa Rica to murder, tor-on the Sandmists — including supnot our military. The "contras" penecenters, food depots and schools. Thousands of civilians have perished, while damage to our economy is in the hundreds of millions of dollars. Mr. Reagan calls these terrorists freedom fighters." His administration tries to cover up their atrocities, dismissing them as "Sandinist propa-ganda." But reports of "contra" atrocities, published last week by U.S. human rights organizations, reveal the truth to the American peo-

ple, who are financing these crimes.

The "contras" are led by ex-officers of the hated National Goard, the main prop of the Somoza dictator-ship that brutally oppressed our peo-ple for more than four decades until our Sandinist revolution in 1979.

It is immoral and contrary to American values for the U.S. administration to attempt to impose a new government on Nicaragua. Our gov-ernment was elected Nov. 4, 1984, in the freest, fairest elections in Nicara-gua's history. More than 1.1 million people voted (75.4 percent of those registered) and seven political parties participated. The opposition parties

vote and now hold 35 of 96 seats in our legislature. Mr. Reagan predictably called the election a "sham," but hundreds of international observers — including private American academic and human rights groups — closely watched the electoral campaign and said that it was fair. 'ments in Central America and to the
The third reason why Americans removal of all foreign military advis-

The problem is not forcing Nicaragua to negotiate but persuading the United States to negotiate.

should reject the plea for more funds to aid Nicaraguan rebels is that the covert war is futile and unnecessary. One pretext for the covert war is the supposed need to force Nicaragua and despite more than \$100 million to the negotiating table. However, as in American aid, the "contras" have failed to capture or hold any Nicaraguan territory. There is only one ex-planation: They have no popular support. As an artificially maintained force, they would cease to exist when Washington ended its support.

There is no reason for Washington to continue this support. Nicaragua represents no threat to any of its legitimate security interests in Central America. In the Contadora process and at talks at Manzanillo, Mexico. begun in June 1984 but sus- gua to negotiate: It is persuading

pended in January '85, we have made

it clear that we are willing to address American concerns. We have repeat-

ed that we want no foreign military

bases on our soil, that we would agree with our neighbors to a reasonable balance of armed forces and arma-

ments in Central America and to the

to the negotiating table. However, as Representative Michael Barnes, Democrat of Maryland, has said, Nicaragua already is there. Nicaragua is fully committed to a political solution. Nicaragua alone accepted the September 1984 proposal of the Contadora countries — Colombia, Mexico, Panama and Venezuela. America sabotaged the accord by pressing its Central American allies not to accept. America, not Nicaragua, broke off the Manzanillo talks. The problem is not forcing Nicara-

Washington to negotiate with Nicaragua, and to give more than lip serrice to the Contadora process.

The fourth reason for stopping aid to the "contras" is that the covert war is counterproductive. If Mr. Reagan really wants us to reduce the size of our army, stop acquiring arms and send home foreign military advisers, he should end his covert war and his unprecedented military buildup in Honduras. If there were no war against us, we would enthusiastically divert manpower and resources, now consumed by defense requirements. to economic and social development.

The U.S. administration complains that we obtain arms from socialist countries, but Washington makes this necessary. Are we not entitled to obtain arms to defend ourselves? Washington has pressed its allies not to sell arms to us.

Mr. Reagan calls us "totalitarian" because we imposed a state of emergency that restricts certain rights, including press freedom with regard to military and security matters. The state of emergency was imposed in 1982 in direct response to the covert war. If Mr. Reagan really wants the full restoration of political and civil rights, he need only stop the war. We seek peace with dignity from the United States. Despite the crimes committed against us, we extend our

ture, and kidnap women, men and port for the "contras" - undermines America criticized the treaty - and States aggression, and it was not until the Contadora countries' effort to rightly so - for failing to provide for promote peace in Central America. In fact the opposite is true.
Without such pressure, U.S. securi-

acceptable negotiated settlement.

Consider the Nicaraguans' reaction to Mr. Reagan's recent comment on the need to remove the Sandinist government in "its present struc-ture": Within days, President Daniel Ortega Saavedra announced an "indefinite moratorium" on the acquisition of arms and said his government would send home 100 Cuban military advisers. He promised "some initiatives in favor of the Contadora peace process," directed by Mexico, Vene-zuela, Colombia and Panama.

This could be an important change in the Sandinist position. In September 1984, Managua accepted a draft of a Contadora treaty that called for an end to support for subversion across borders, the elimination of foreign troops and advisers from the region, limits on the size of Central

ty interests are sure to be ignored.

With it, they are more likely to be reflected in talks that could lead to an and that it was evidently trying to itself had the technology necessary to and that it was evidently trying to undermine the Contadora process. Both points are debatable, but beside the point. Washington is right to worry about compliance by the nondemocratic governments of Nicaragua and Cuba and should not assume sole responsibility for monitoring a multilateral treaty — particularly in Latin America, where America is mistrusted and criticized for intervention.

The Nicaraguans accepted the draft treaty on condition that it not be changed. The other Central American countries, backed by Washing-ton, refused to sign. With United States help, they drafted their own trenty, which seemed to both Nicaragua and Contadora countries to favor Washington's interests. The result was a stalemate, broken finally by Mr. Ortega's announcement.

Contadora countries began their ef-forts in January 1983. Their initial emphasis was on potential United Washington increased its military presence in the region by military maneuvers in mid-1983 that they began to show any concern for Cuban and Nicaraguan behavior.

Critics of the U.S. administration

argue that it hopes to overthrow the Sandinists, not settle with them and that it prefers that the Contadora negotiations be stalemated. There is some truth to this argument. But the administration is significantly divided over how to deal with Nicaragua. Some officials believe the Sandinists cannot be trusted to abide by a negotiated settlement. These officials may indeed be using their professed support for Contadora as a cover for a policy that they believe can over-throw the Sandinists. Others believe that a negotiated settlement is both possible and preferable, provided the treaty is subject to adequate verification and based on all 21 points proposed by Contadora — including po-litical liberalization that would "alter the structure" of the Sandinist gov-

ernment without overthrowing it. These supporters of a negotiated settlement may be a minority and may need allies — those critics of U.S. administration policy who also advocate a negotiated settlement. There are good arguments against supporting the guerrillas. But the critics too should have an interest in a good treaty - based on the 21 points with adequate provisions for verification and implementation — and should think twice before opposing any United States policies that could help produce such an accord.

The writer directs the Latin American program at the Council on Foreign Rela-tions, an independent organization of Americans interested in diplomacy. She contributed this to The New York Times.

STANKS

By Michael Getler

ONDON - Out of all the hardships and hatreds spawned by the yearlong coal miners' strike that ended March 3 emerges something

oddly reassuring about Britain.

It is not so much that a strike led
by a Marxist union chief, Arthur
Scargill, has been defeated, although most Britons seem relieved that it failed. "Scargillism" came to stand in many minds for the vanguard of a revolutionary political effort aimed at overturning the Conservative gov-ernment of Prime Minister Margaret Thatcher and defeating her enthus asm for a revival of capitalism. Rather, it is a sense that old virtues

of tenacity, loyalty, dedication to colleagues and community and plain toughness are alive and admired here.

Whatever the long-term political and economic implications of this extraordinary clash, it seems that the vast majority of Britain's 186,000 coal miners — including those who struck and endured extreme financial hardship and those who kept working and endured sometimes fearsome intimidation - acted with a brand of personal courage that has often dis-tinguished Britain in trying times

The National Union of Mineworkers has suffered what appears to be a severe defeat. The idea that this once all-powerful union could never be successfully faced down by a tough government has been laid to rest. And yet the mystique of the mineworker remains. It may even have been strengthened.

There were lumps in more than one. throat around Britain as television recorded scene after scene of miners, arms locked together, parading back to their coal pits behind off-key colliery brass bands and battered local union banners after the union's decision to go back without a settlement.

In a way it seemed pathetic. Hundreds of men in dozens of mining villages gathering in the pre-dawn darkness, their lunch in plastic shopping bags, and then marching back to work, cheering and chanting slogans as if they had won a victory. Said one miner, with typical Welsh eloquence, "We may have lost a

year's pay but we've retained the things that matter most in these valleys — our dignity and self-respect."

The strike spawned violence that joited much of more comfortable Britain; there was arson, assault, vandalism, even a murder. The violence often overshadowed the personal suf-

fering. It may also have produced a

cadre of future young radicals who will come back to haunt another govrument on other picket lines.

The vanguard of the most militanian backers of Arthur Scargill that manned the picket lines was sizable. and undoubtedly helped intimidatesome miners who might otherwise... have sone back to work. But it cannot fully explain why more than 120,000 stayed away, with no strike pay from

their union, having to subsist on per-haps \$25 a week, plus food handouts for a year in many cases. Essentially the strike was an effort to postpone the inevitable and pre serve a way of life. Most Britons understand that coal pits that require-huge taxpayer subsidies and operate at a big loss have to close in favor of,

ones that can make a profit and compete in the marketplace. But closing a pit means closing a community, and there are important social costs.

Britons are not as mobile as American cans. They do not pick up and mov. easily. There are not many other jobs

to go to, and there is nobody to buy their homes if they leave. The mining communities are tightly knit, some what insular, centered around miners' welfare clubs, the local pubs, the bands, banners, sports clubs and cen-turies-old tradition and comradeship Many miners in America may want their children to become something

else, but many in Britain struck & that their children and grandchildren. could work in the mines. They were they said, "fighting for our class." In some ways this was a strike that did not seem to make sense. It was

called in March, with spring ap proaching, when coal stockpiles were full at electric power plants. Record 13-percent unemployment made i unlikely that other unions would walk out to support the miners.

Most important, it began with fatal mistake. Mr. Scargill ordered ( nationwide strike without a nation -

wide ballot of the union's members. One result was that some 45,000 miners in Nottinghamshire rebellet against what they saw as infingement of union rules and democracy
They kept on working, riding buse with steel grates on the window. through fierce picket lines and fre quent threats against their lives, fam liles and homes. Here, too, was cour age of which Britons could be proud The Washington Post.

#### LETTERS TO THE EDITOR

Two Mandates at Odds

Regarding the editorial "Imperial and Bellicose" (Feb. 25):

Thank you for injecting some com-mon sease into the debate on the growing conflict between Nicaragua and the United States. If memory serves, most Nicaraguans voted in the November elections and most of those who did so voted for the Sandinists. This would appear to be a stronger mandate to govern than even that received by Mr. Reagan.

I would suggest that not only were the Nicaraguan elections honest, as attested by teams of international observers, but that no "tyranny" would wish to arm its entire population.

P. McNEILL Fribourg, Switzerland.

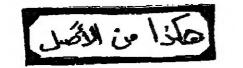

President Reagan calls the government of Nicaragua "repressive, to-talitarian and cruel," while he not only remains silent but supports the reign of terror and state of siege in

Chile. Ask Nicaraguans if they an better off now than under Somoza. T. ROBERGE.

#### Uniforms Underground

The report "Subway Security How Some Cities Fare" (March 6 speaks of a "heavy presence of pa trolling militiamen" in the Moscor metro. There definitely is not. I an certain that you can count man more policemen per number of pas sengers in the New York subway or it our own mini-subway in Amsterdan The confusion may stem from th fact that the Soviet street scene show many more uniformed people than i ed with the Soviet military or th Ministry of Internal Affairs. They too, take the subway. Rarely does on see patrolling militiamen in a Mos cow subway station of car.

## Reagan to Pressure Congress Anew For Aid to Guerrillas in Nicaragua

By Joanne Omang

WASHINGTON - The Reagan administration, discarding the indirect approaches it had recently considered, has decided to make a major new effort to pressure Congress to approve funds for anti-Sandinist guerrillas in Nicaragua.

The administration has considered and apparently rejected, at least for now, several alternatives to the funding. These include using U.S. allies in Latin America or Asia s turnover was 10 billion as conduits for rebel aid, the possible suspension of U.S. relations with Nicaragua, and recognition of a rebel government outside the

aulo suburban prison shot and said last week that the stakes of illed 11 inmates armed with U.S. credibility and national interape Wednesday, officials said. stitute what one called "a line in the dust" that Mr. Reagan can draw to

By William J. Broad New York Times Service'
New York Times Service'
NEW YORK — Insights into
the creative genius of Thomas

Alva Edison, one of the most pro-lific inventors of all time, are emerging from a 20-year, \$6-million study of his personal papers. The new portrait of Edison is marked by his powerful ability never fully recognized until now -to reason through analogy. It was perhaps this trait more than any flashes of brilliance that accounted for his great inventiveness. It is now thought that this ability is what transformed one successful invention into another, eventually producing the phonograph, the in-candescent light bulb, systems of

electric power generation and mo-Edison was born Feb. 11, 1847, in Milan, Ohio. He devoted himself to the quest for invention while still in his 20s. At his death in 1931 he left behind more than 3.5 million pages of notebooks and letters, much of it documenting his 1,093 patents. No one has ever produced

These documents give you en-try into the mind of one of the world's most creative people," said Dr. Reese V. Jenkins, a historian and director of the Thomas A. Edison Papers at Rutgers University in New Brunswick, New Jersey. "In fact, they tell a lot about the very essence of invention itself."

Edison's inventions were often much more closely related in their origins than anyone had suspected, according to clues being gathered by Dr. Jenkins and his colleagues. For example, early drawings of the scope had film that wound back and forth on rollers, allowing a spectator to view moving images through a peephole in the top of the large machine. From this device it was but a short step to motion pictures as we know them today.

Dr. Jenkins and his team discovcred that the device had evolved slowly. The clues were found in preliminary patents, known as ca-veats, filed by Edison on the ki-netoscope from 1888 to 1889. The first caveat looked nothing like the finished machine but showed a cylinder covered with a spiral of images meant to be viewed through an piece. The resemblance to Edison's first phonograph, made a de-cade earlier, was striking.

Each of the two inventions had an axle and a cylinder. Each had an instrument (stylus or eyepiece) that deciphered a spiral of information (grooves for sound, images for pic-

Dr. Jenkins said that no historian, on the basis of the visual resemblance alone, would suggest that Edison had been inspired by his own earlier work. But Edison also left a written record. The first page of Edison's motion picture caveat begins: "I am experimenting upon an instrument which does for the eye what the phonograph does for the ear." A few lines later: "The invention consists in photograph-ing continuously a series of pictures in a continuous spiral on a

cylinder or plate in the same manner as sound is recorded on the phonograph." "If we didn't have the earliest sketches and notes," Dr. Jenkins

said, "we wouldn't be able to see kinetoscope, a prototype movie machine, reveal that it evolved being able to get into the creative machine, reveal that it evolved being able to get into the creative mind, watching it work by analogy series circuits. When one bulb in a series circuits. When one bulb in a phy," Mr. Israel said. "Electrometric circuits. When one bulb in a series circuit failed, as often hap proach he had already perfected.

Edison with wax-cylinder phonograph in 1888.

lighting is basically an elaboration of Edison's original idea.

To solve the problem, Edison in-

creased the individual resistance of

to another. Edison didn't ultimately solve the problem that way. The finished kinetoscope looked very

Paul Israel, an assistant editor of the Edison Papers, said another example of innovation by analogy was seen in Edison's work on the incandescent light bulb. Although his final invention was a simple bulb, the early versions had devices to regulate the amount of current flowing through them. Sketches in the Edison notebooks show that from what at first glance looks far removed from electric lights — early work on the telegraph.

his early lamps by building current-limiting regulators. "It's clear that his original idea came from telegra-phy," Mr. Israel said. "Electrome-Regulatory devices were needed

create a means of controlling the amount of current that went into the lamp by the same sort of regula-

Eventually, as work progressed, Edison chose thin carbon filaments for his bulbs, their hallmark being very high resistance. After that in-sight, all the regulatory apparatus was abandoned. The end result was a simple parallel system that nothing like what Edison By making Edison's personal pa-pers available to scholars and histo-

rians around the world, the Edisor Papers project aims to facilitate insights into how the inventor worked. So vast are the Edison materials that the process of publica-tion will take 20 years. In addition to papers found at the Edison National Historic Site, in West Orange, New Jersey, the project is gathering materials from hundreds pened in the early days, the rest of the bulbs would go out. In parallel circuits, however, the rest would of other sites around the world. The main sponsors of the project are Rutgers University; the Edison National Historic Site, part of the stay on. The modern system of National Park Service; the New

Jersey Historical Commission; and

Starting in about a year, the project will publish the first of 15 to 20 hard-cover volumes that will contain a selection of the Edison Papers and will include background and biographical information. It will be published by the Johns Hopkins University Press.

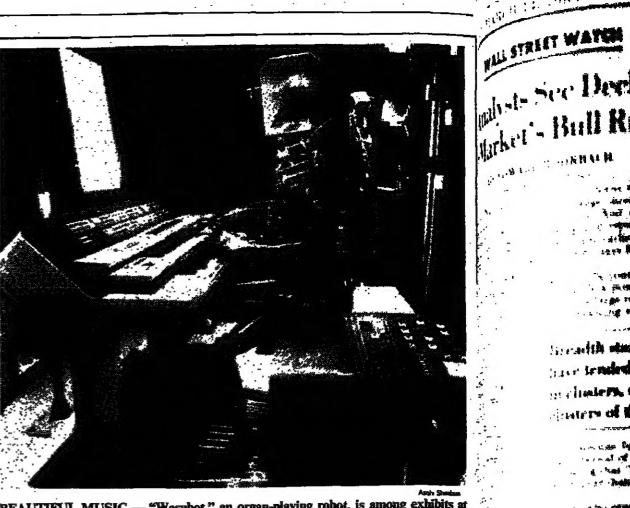

Dr. Jenkins said the papers had already provided other insights into Edison's inventive process in addition to his powerful ability to

reason by analogy.
"We have this image of Edison as the lone inventor," said Dr. Jenkins. "That's not the case at all. One of his real talents and insights was that he saw he could accom-plish so much more by working with a group. He's really a pioneer of team research. That's probably one of the most important things he

Edison set up laboratories first in Newark, New Jersey, then Menlo Park, and finally West Orange. At times, he had more than 100 workers and assistants. There are more than 3,000 laboratory notebooks at the Edison National Historic Site. Dr. Jenkins said more than half of those were filled by Edison's assis-

"This does not diminish Edison at all." he said. "There's no doubt about his genuine creativity. Even those around him with enormous technical education in mathematics and science had great admiration for his skills and intuition. But at the same time he had many hands and many minds that he was workhim an advantage. That has to have been a major factor in his enormous productivity."

Edison himself characterized his laboratory as "an invention fac-

BEAUTIFUL MUSIC — "Wasubot," an organ-playing robot, is among exhibitant Tsukuba Expo '85, a six-month international science fair opening Sunday on a 100-hectare site near Tokyo. On the theme "Dwellings and Surroundings — Science and Technology for Man at Home," the exhibition will include displays by Japanese government and industries, 47 other countries and 37 international organizations.

#### conducting material, such as a hot gas, is directed through a magnetic of its rotation. The northern zon-By Walter Sullivan New York Times Service In a similar fashion, electrical

NEW YORK—The aurora bo-realis, or Northern Lights, among the most spectacular of celestial phenomena, have been seen since the beginning of time. Now they are being seen as never before, ientists observe them from

above, below and within. A U.S. satellite, Dynamics Explorer 1, in photographs from far out in space, records small auroral large "storm" every four to six can heat the atmosphere over the

The ultraviolet scanner on HI-LAT, the High Latitude satellite. transmitted images in 1983 that showed for the first time that auroras occur as often over the sunlight side of the planet as on the night side. Because Earth observers can see the Northern Lights or Southem Lights - the aurora australis — only at night, it had previously been impossible to show that they

occur as extensively in the daytime. Other spacecraft, seeking the source of the energy that drives the Northern Lights, have identified two regions where the atomic particles that produce auroras are accel-

Auroras have always delighted out along the tail. skywatchers, terrified the superstitions and puzzled scientists. They take many forms: rays that form a curtain of light hundreds of miles

high; a many-colored arc reaching from horizon to horizon, a pulsating, diffuse glow.

Auroras are caused by very highenergy particles, chiefly electrons,

plunging from space into the atmo-sphere along the outermost, closed force lines of the Earth's magnetic field. Those force lines enter the atmosphere in circular zones surrounding each polar region.

When these plunging electrons hit atoms of the high atmosphere, the atoms glow in colors indicating their composition and the electron energies. Dr. Syun-Ichi Akasofu, a veteran aurora-watcher at the University of Alaska, likens the effect to that of the "gun" that fires a stream of electrons at the fluorescent screen of a television set. In both cases the ever-changing images are produced by magnetic fields that control the impinging

What has long puzzled scientists is how these particles, which hit the atmosphere at 1,000 miles a second, gain enough energy to pro-duce their dazzling effects. It now appears that the aurora's original energy source is the swift motion of the solar wind past the magnetosphere, the area of space affected by the Earth's magnetism. On the son-facing side the magnetosphere is flattened by that wind, which moves at more than a million miles an hour; on the opposite side it is blown into a comet-like tail probably more than a million miles long.

When in late 1983 the satellite International Sun-Earth Explorer 3 was sent to intercept the comet Giacobini-Zinner, it repeatedly passed in and out of the tail, tracing it for 850,000 miles, far beyond the orbit of the moon. Its data and those collected in 1974 by Interplanetary Monitoring Platform 8, or IMP 8, have helped explain the energy-generating mechanism.

As Dr. Louis A. Frank of the University of Iowa interprets these data, electrical energy is initially pumped into the magnetosphere along the boundary of the tail, in a process resembling magnetohydrodynamics, which physicists have sought to use for electric power

An ordinary dynamo makes elecal that conducts electricity rotates

energy is pumped into the tail of the magnetosphere as the solar wind crosses magnetic field lines derived from the Earth. Dr. Frank says this energy is stored, then re-leased in "fireballs" that send jets of protons and electrons both outward and Earthward along the tail.

Such processes are of more than events about twice a day and a academic interest. Auroral displays arctic enough to affect the trajec-tories of ballistic missiles, or induce currents strong enough to cause

or blackouts in power lines. The auroras are also of interest to those seeking to emulate the energy process in the sun by using nagnetism to compress and heat hydrogen nuclei enough to make them fuse into belium nuclei. These scientists would like to know how magnetic fields downwind of the Earth compress and heat the electrified gas, or plasma, in the tail with such efficiency.

Dr. Frank said he suspected that passes between layers of electri erated: one in "fireballs" hundreds "fireballs" of energy may occur a. current that have opposite polar of thousands of miles from the far as 400,000 miles downwind of ties. #### IN BRIEF

#### Laser Used Against Endometriosis

WASHINGTON (UPI) — Lasers are increasingly replacing traditional surgery for treatment of women's reproductive problems, such the endometriosis, a condition in which the kind of tissue lining the utent grows outside the uterine cavity. It often leads to infertility, and some times can be arrested only by a histogram.

grows outside the uterine cavity. It often leads to infertility, and some times can be arrested only by a hysterectomy.

Surgeons who advocate them say lasers offer the advantage of spee cause little or no bleeding and can reach tissue that scalpels could new touch, as well as areas affected by endometriosis where it would be dangerous to use other methods, such as cautery.

Dr. Joseph Bellina, co-director of the Omega Institute, a fertility treatment and research center in New Orleans, did the early development work on laser treatment for endometriosis in 1978. He said the technique will probably become widely accepted by next year. Its chief disadvartages, he said, are that it requires special training and constant practice and is costly.

#### New Oil Absorbent Tested in India

NEW DELHI (AFP) — Indian scientists say they have developed reusable material that absorbs oil and could be used to combat oil spill "Hydrophobic silicate material" has been tested at a refinery, the scientists They said it absorbs the oil and forms a thick sludge that remains for t

long as six days on the surface of water, where it can be skimmed off one a technique for doing so is developed. Dr. S. K. Sharma told the Pre Trust of India that the material would soon be tested under "sea water.

He said experiments showed that the silicate material was superior 1 oil absorbents such as polyurethane foam, polystyrene powder an shavings. It can remove up to 95 percent of an oil stick even when the slick's concentration is as low as 15 liters of oil to a million liters of water than the slick's concentration is as low as 15 liters of oil to a million liters of water than the slick's concentration is as low as 15 liters of oil to a million liters of water than the slick's concentration is as low as 15 liters of oil to a million liters of water than the slick's concentration is as low as 15 liters of oil to a million liters of water than the slick is the slick of the s the news agency quoted Dr. Sharma as saying.

#### **Cheap Computer Receiving Device**

CANNES (AFP) - A Dutch engineer says he has developed a \$ device that can locate, receive and reproduce text typed on a computing terminal anywhere within a one-kilometer radius (about 1,000 yards). The device could oblige users of terminals handling confident information to screen their tubes with aluminum foil or with a mo sophisticated device called a Faraday cage.

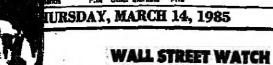

Wim van Eck of the Neber Telecommunications Laboratory demo strated his device in Cannes at the Third-World Congress for 0 Protection and Security of Information Technology and Communic tions, or Securicom. The technique was known to military specialists, Securicom official said.

#### **Cordless-Phone Warning Repeated**

WASHINGTON (AP) — The danger of severe damage to the hearth from cordless telephones, first reported almost two years ago, is still extreme concern, federal authorities and industry spokesmen say. More than 100 cases of hearing loss blamed on the popular phon have been reported.

The problem involves phones with the bell inside the carpiece. Mar tricity when an armature of materi- cordless phones require the user to switch from the mode for incomit calls to the "talk" mode before dialing a call. #### ew Analysts See Decline fter Market's Bull Run

By EDWARD ROHRBACH International Herald Tribuna

HARGING bulls may flash their horns while thundering ahead, but they can't change direction quickly. Matadors stake their lives on it. And it's something market technicians are staking their reputations on.

"Wall Street's breadth and momentum earlier in the year ficate there's more bull market to come," says Robert Farrell, exrill Lynch's chief market analyst.

Moreover, he thinks any pullback would be contained: "There are no precedent in recent history for such a powerful breadth and being followed by an interesting to be a powerful breadth.

ampede being followed by an immediate large reaction." Citing the strong positive ratios of advancing stocks to those

clining in daily Januarybruary trading, he said that the nine times that such els were reached in the last vears, a major market dee never developed in the kt three months.

stocks churn on lower volume.

Mr. Farrell says that while more attempts at penetrating 1,300 in the Dow average are probable in coming weeks, unless a new gh for the index also shows "good breadth, I'd look for a

gh for the index also shows "good breams,"

"rection of 5 percent to 10 percent."

"He blames the market's recent weakness on the "bond market aking and interest rates ficking up," but concluded: "We have ore upside to come, probably in the next month or so."

Mr. Russell says flatly that "the market looks good," and cites ck of selling pressure since stocks peaked in February. "We wen't had a single day since then where stocks hitting new lows ive outnumbered those reaching new highs."

ALL he sees the market suffering from now is "exhaustion" after its rump and he believes that the rally could resume later this month.

Mr. Zweig, less a market technician than the other two, shares r. Farrell's concern about any rally stalling at the 1,300-barrier id he agrees that there is little risk of stocks plunging after the

"But for now, it looks like a trading-range market, with swings more than 40 points of where we are here," he said. However, Michael Sherman, portfolio strategist at Shearson shman/American Express, disputes the glowing image painted market technicians of the January-February surge.

I never felt the breadth figures were saying all that much," he id. "There had been a tremendous purge of small stocks in tail accounts and it was natural to see a bounce after the tax lling for 1984 was over."

Yet Mr. Sherman, a long-time bull who takes a fundamental proach to the stock market, remains optimistic. He predicts terest rates will fall and believes that could take the Dow up to 350, perhaps next month.

He warns that Wall Street will "narrow," however, with the t of a strong dollar continuing to divide performance in the arket between companies affected adversely and those not. "Overall, there's going to be a real problem determining where m will want to be in the market," Mr. Sherman added. "Take a (Continued on Page 17, Col. 1)

# Bank Sees Shift on **Debt Cost**

#### Receipts Less Than Servicing

Agence France-Presse
PARIS — The cost of debt servicing to developing countries in 1984 for the first time surpassed total funds received from industrialized nations, World Bank statis-tics indicated Wednesday. The bank report also said that

Third World indebtedness would rise to \$970 billion by the end of Third World countries last year made debt-related payments of \$92 billion while receiving \$85 billion in investments, credits, aid and other capital flows, the bank said, citing statistics covering 104 develop-

ing nations.
In 1981, net transfers to the Third World were valued at \$31.2 billion, but by 1983 that figure had

been reduced to \$1 billion.

The bank said the cost of debt servicing rose 7.7 percent in 1984, principally because of high interest rates. The bank's figures, however, do not take into account the in-crease over the year in the value of the U.S. dollar.

The bank figures revealed a sharp decline in credits to developing countries from richer nations in the 1980s. From 1981 to 1983, state-backed guaranteed credits dropped 21 percent while private credits fell 27 percent. In drought-stricken sub-Saharan

Africa, the decline has been especially pronounced. The value of private credits plummeted from \$1.5 billion to \$149 million be-

tween 1979 to 1983.

But the bank found considerable improvement in the financial situation of Latin American countries where some of the most heavily indebted nations are located. It said such a trend has yet to be felt among all poor countries, notably in Africa south of the Sahara.

Persistent depressed world prices for commodities last year prevent-ed many Third World countries from improving their terms of trade and overcoming their financial dif-ficulties, the bank found.

#### Mexican Accord Seen

Mexico is expected to reach agreement shortly with the Interna-tional Monetary Fund on a letter of intent for the third and final year of its extended fund facility, Citihank's senior vice president. William Rhodes, said Wednesday.

"It's my understanding that a letter of intent will be signed within sharply in 1986.

# **Boesky Takes** Energy Firm

WASHINGTON - Ivan F. Boesky, a New York City investor, pushing forward a two-stage tax told the Securities and Exchange cut of 20 billion Deutsche marks Commission on Wednesday that he had acquired 3,743,300 shares in the tax cut, as originally planned, told the Securities and Exchange Commission on Wednesday that he had acquired 3,743,300 shares in American Natural Resources Co., or 9.9 percent of the total shares

Mr. Boesky said a group of com-panies he controls paid \$229.5 mil-lion for the shares, which had been purchased in the open market since

The board of American Natural Resources, a Detroit-based pipeline company, was meeting Wednesday to decide how to respond to an offer from Houstonbased Coastal Corp. to buy all stock outstanding in American Natural Resources for \$60 a share. The offer from Coastal, another energy company, was announced March !.

#### R Signs of Warming Seen Earlier, Robert J. Cole of The New York Times reported from New

Americas Natural Resources said that its chairman and chief executive, Arthur R. Seder Jr., had met Tuesday with Oscar S. Wyan Jr., head of Coastal Corp.
Up to now Mr. Seder bad re-

fused to even meet Mr. Wyatt and American has been vigorously op-posing his unwanted advances. Whether the meeting meant that

Mr. Seder had now decided to negotiate a deal with Mr. Wyatt could not be determined. American said only that the discussions dealt with "matters pertaining to Coastal's tender offer" for the company. American acknowledged that the top executives had met Tuesday in

Detroit after American's stock price started advancing on the basis of widespread Wall Street reports that talks were under way. By the end of the day Tuesday, American's stock stood at \$62 on the New York Stock Exchange, up \$1.25, with nearly 1.6 million

shares changing hands. Two weeks ago Mr. Wyatt offered American's stockholders \$2.3 billion in each, or \$60 a share. He also announced plans for a proxy fight to oust American's board. Mr. Seder spurned the takeover bid as "entirely inadequate" and immedi-ately began working on a number of other possibilities in a move to frustrate Mr. Wyatt's offer.

# Mexican Firm Sues Japan's Mitsui

#### **Trade Relations** Unravel Over Textile Machine

By Richard J. Meislin

New York Times Service

MEXICO CITY — All Rafael
Alkon wanted, when he ordered
his advanced Japanese textile

machines four years ago, was to make a new type of high-quality flocked fabric — the suede-like cloth used in clothing and upholstery. His ambition, he says, was to become the only maker of ex-port-quality flocked fabric in Mexico.

What he got instead from Ja-pan's Mitsui Trading Co., Mr. Alkon contends, is used and de-teriorated equipment that has not worked since the moment it was installed, and a key role in an international trade disaster the likes of which have seldom been seen here.

Following legal action by Mr. Alkon, two of the Japanese executives of Mitsni's local subsidiary have been jailed under Mexico's fraud statutes for a month; a third, who also is the president of the Japanese Chamber of Commerce here, was jailed brief-

According to Mr. Alkon, his most recent success was to have the assets of Mitsui in Mexico frozen by a Mexican judge.

By most accounts, the incident has already strained relations between the two countries. The Japanese Foreign Minister, Shintaro Abe, has written to President Miguel de la Madrid about the case, but the contents of his message have not been revealed.

However, a spokesman for the Japanese Foreign Ministry, Yo-shio Hatano, said in Tokyo recently, "We hope that this question will not have an unfavorable impact on the relationship between our two countries, and we have expressed our hope, but this

# U.S. Retail Sales Increased 1.4% In February

By Jane Seaberry
Washington Post Service
WASHINGTON — Retail sales

in the United States climbed 1.4 percent last month, the largest increase since November, suggesting renewed buoyancy in consumer buying, the government said Wednesday.

The strength of the February spending figures surprised economists who thought that economic activity was beginning to slow. However, consumer spending numbers have been erratic in recent months, following the steady, strong surge in consumer spending in the like period last year.

Consumer purchases rose 0.5 percent in January, the Commerce Department said.

Automobile sales remained strong in January. Excluding those purchases, retail sales rose 1.7 per-cent, the sharpest rise since Sep-tember, the Commerce Depart-

ment said. "The advance in retail sales should help bring retailers' inven-tories down more in line with volume and clear the way for further growth in domestic output and em-ployment," said Commerce Secre-

tary Malcolm Baldrige. "With con-sumer confidence high and employment and incomes rising, retail spending should continue to Economists said they expect consumer spending to continue to grow moderately this year, at a rate of about 3.5 percent compared with 4.2 percent last year. That forecast could be threatened by slightly higher inflation, a decline in sav-

ings, a rise in interest rates and an

increase in the debt burden, the

"The government's efforts to re-

ratio of consumer debt outstanding to disposable income. Generally when debt burdens

until their personal finances are in

better shape, economists said. However, economists said that several reasons could cause consumers to increase their debt burdens beyond the record. Credit cards are being used more and ma-turities on consumer loans are being lengthened to lower monthly

payments, they said. Additionally, alternative debt instruments such as variable rate loans are being used and many states have raised usury ceilings which in the past have constrained lending activity, they said.

Other factors affecting continued consumer spending are in-creases in employment and higher disposable incomes. Consumer confidence also remains high, econ-

Sales of durable goods, items ex-pected to last at least three years, rose 1.7 percent in February.

#### **Dollar Higher** In Europe in Calm Trading

The Associated Press
LONDON — The U.S. dollar was slightly higher in calm European trading Wednesday. Currency dealers said trading

was quiet in contrasted with the first two days of this week when there were sharp swings in the U.S. currency's value. "Quite a number of traders remained on the sidelines today licking the wounds they suffered Monday and Tuesday," a banker in Frankfurt said.

The dealers could not explain why the dollar reacted the way it did to Wednesday's announcement in Washington that U.S. retail sales rose 1.4 percent in February. "The better-than-expected retail result showed that the American economy is still more buoyant than many thought," a trader in Frankfurt said. Late Wednesday in London,

the pound was trading at \$1.0868, compared with \$1.0885 late Tuesday. Other late dollar rates, compared with late Tuesday: 3.354 Deutsche marks, up from 3.352, and 10.250 French francs, from 10.238.

Gold prices rose in strong buying, bullion dealers said Gold was quoted in London at a late bid of \$293.40 an ounce, up from \$288.40 late Tuesday.

#### Move May Be Sign of Dutch Investment Business Shakeout

By Bob Hagerty stemational Herald Tribuse

LONDON - A new subsidiary of Aubert & Cie., a Geneva portfo-lio-management concern, plans to take a role in the administration of

investment accounts currently handled by Financial Planning Services BV, or FPS, a controversial Amsterdam securities firm. Aubert, in response to questions from the International Herald Tribone, said Tuesday that it had en-

tered into a business relationship with Leyton Investments Ltd. of Guernsey, in the Channel Islands. The owners of Leyton have not been identified. Aubert said that it had been informed that Leyton had acquired "certain assets" of FPS. The sale of assets, details of

which remain unclear, appears to be an early sign of an expected shakeout among unregulated Amsterdam securities firms. Such firms, whose salesmen typically use telephones to solicit unsophisticated investors across the globe, have been hurt during the past year by bad publicity.

Prodded by complaints from investors and the financial community, the Dutch government late last year promised legislation requiring that firms offering investments to the public either belong to a recognized exchange or obtain a license from the government.

Sources close to FPS said that its owners might have wanted to sell owners might have wanted to sell Valcurs White Weld S.A. been affected by bad publicity. They just don't feel there is any

Some investors have complained firms in executing orders to sell · Walter Fantin, interim manag-

ing director of FPS, acknowledged this problem in a telephone interview. Mr. Fantin said he had a "mountain of mail" and added, There are some (clients) that have sent two or three letters, but we are getting to them." Aubert's involvement is through

a new unit, Aubert Capital Venture SA. A statement from the unit said its role "is limited to ensuring that the client's money has been transferred and that the bookkeeping has been properly performed." The statement added that Aubert "nev er has had the intention to deal directly with Financial Planning Services BV or with any other com pany of the same type."

Jean-Pierre Aubert, who heads

Aubert & Cic., said in an interview that his company agreed to the ar-

# **High-Tech Outlook Slows NYSE**

NEW YORK - The outlook for slower earnings growth among certain high-technology

companies triggered a sharp drop on the New York Stock Exchange late Wednesday. The Dow Jones industrial average was down 8.72 to 1.263.03 an hour before the close of trading. Declines led advances, 948-478, among the 1,932 issues traded.

Volume was about 83.040,000 shares, com-

Although prices in tables on these pages are from the 4 P.M. close in New York, for time reasons this article is based on the market at 3 P.M.

pared with 76,620,000 in the same period Tues-

day.

Before the market opened, the Commerce 1.4 percent in February to a record \$112.1 billion. It was the biggest increase since an increase of 1.4 percent in November. Department stores reported 3.7 percent higher sales than in January. Auto dealers said they did only

0.4 percent better. "We're really getting climactic selling in the high-lechnology, computer and semiconductor stocks," said Alfred Goldman of A.G. Edwards & Sons of St. Louis. "We're seeing land mines going off in a very indiscriminate fashion." Mr. Goldman said the selloff in technology issues would serve to wring excess enthusia out of the market.

"We have whittled down the over-bought condition, and after today's disaster we will see

the reduction in interest in owning stocks that you usually see right before a rally," he said. He said with the stock market going down, the retail sales report would be interpreted as a negative rather than a positive factor. Investors would focus on the outlook for an economy expanding too fast with upward pressure on interest rates.

1,916 427 1,265 1,452 1,147

Phillips Petroleum was near the top of the active list and up a fraction at midday. A block

of 225,000 was traded at 48%.

American Natural Resources was higher at midday in active trading. The company said it was discussing a merger in which stockholders would get \$65 a share from Coastal Corp. Previously, Coastal had bid \$60 a share.

Computervision was sharply lower on heavy

volume. The company said it would break even in the first quarter, and revenue growth would be less than anticipated but ahead of last year. Other losers in the computer group at midday included IBM, Data General, Advanced Micro Devices, Hewlett Packard and Digital Equip-ment. Digital fell 4% Tuesday when an analyst

lowered earnings estimates, Texas Instruments, National Semiconductor and Motorola were lower.

in the auto group, Chrysler was up a Iraction while General Motors and Ford moved lower.

Vecco Instruments lost ground after an analyst lowered his opinion on the stock. The company said new orders were improving after

had agreed to a merger with Flexi-Van. a trans-portation concern. Flexi-Van was higher.

a decline in December and January.

Castle & Cooke was off a fraction after the announcement late Tuesday that the company 12 Month High Low Stock 2014 CRISTIT II 1.00 3.1

# Why multinationals seeking to buy or sell a company should begin at The Morgan Bank

forgan is a major force in cross-border nergers and acquisitions and divestitures ecause we offer to buyers and sellers nywhere in the world key advantages reativity, depth of experience, breadth of esources, attention to confidentiality, and bjective advice.

'alk to Morgan's M&A professionals in New ork, in London, in Tokyo and you'll quickly iscover Morgan can help you in many key 'ays—whether you intend to buy or sell. forgan's strengths include:

☐ Among banks and investment banks forgan is a leader in cross-border transactons. Because we're worldwide, the buyers nd sellers are already known to us, frequently s Morgan banking clients. And our contacts re at the highest decision-making levels.

☐ Morgan doesn't just do deals. Our M&A adice is objective, because our views of any transction are based on your company's long-term est interests. We're in it with you all the way.

☐ Morgan's Financial Analysis Department plays an important role in our M&A activity. Staffed with more than 100 professional analysts in 18 countries, it's one of the largest, most experienced research teams in the world. These experts understand financial planning and corporate strategies, specialize in key industries, and are completely at home in the countries where they operate. They take each analysis beyond the standard indexes of value to search out factors that aren't immediately discernible and yet often reflect true worth. And they never base their valuations just on predetermined formulas, because they recognize that each company or division calls for a different type of analysis.

☐ Morgan clients also have the added value of Morgan's extensive international electronic library that gives us—and our clients—access to the current names, locations, industry, and specific acquisition or divestiture intentions of thousands of public and private companies located around the world.

We offer a total advisory capability to help you thread your way through the maze of modern M&A requirements. You can use all our services, or part of them. Defining your criteria. Preparing industry studies. Identifying, screening, and approaching possible targets. Helping establish prices. Working with your legal counsel and accountants. Assisting in negotiations on price and structure. Closing the deal.

Of course, Morgan fully protects each client's confidential information and interests. We've set up special internal controls and safeguards to ensure strict secrecy of M&A assignments—from the first contact to the final handshake.

# DRUG DEALERS MAY BE LOSING ONE OF THEIR MOST IMPORTANT CONNECTIONS.

The U.S. Treasury is coming down hard on drug dealers, and the banks they use to wash away any link between the drugs and the profits made from them.

This week's cover story in Business Week points out that the U.S. drug trade is an \$80 billion a year business transacted in \$20 bills.

So simply to avoid being drowned in cash, the dealers need money laundering.

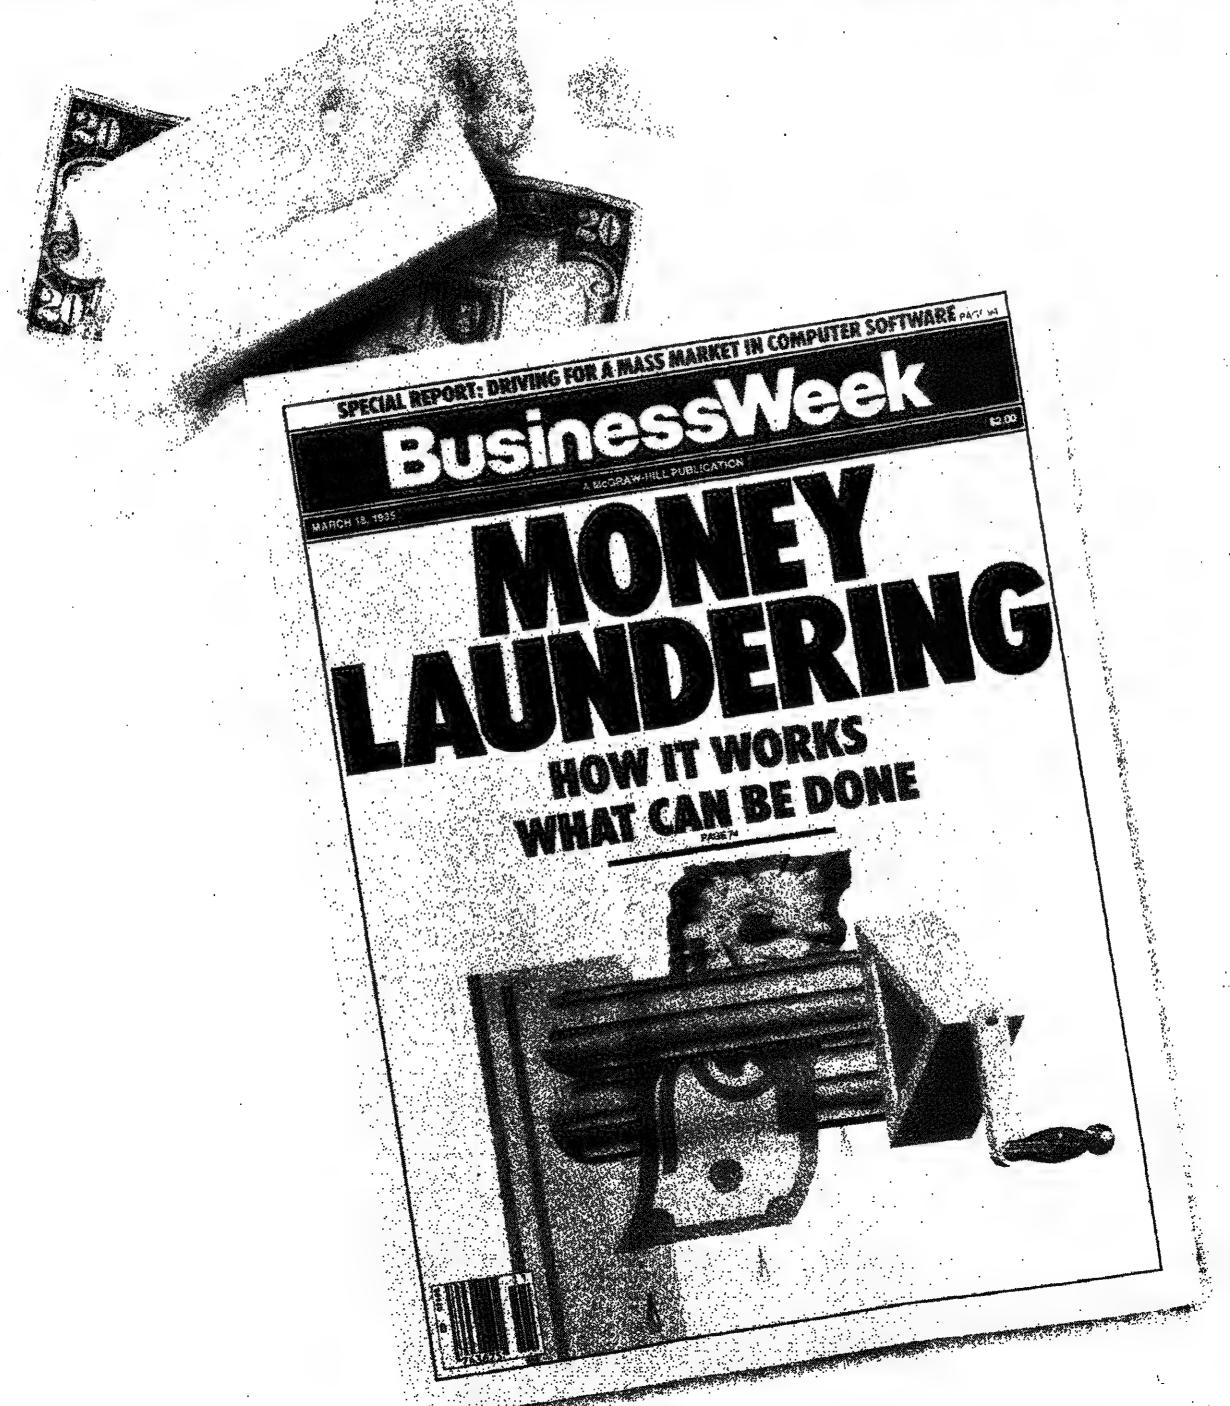

But authorities are using tough new laws against them. One even allows the government to confiscate the dealers' ill-gotten gains.

And while some banks are cooperating, according to Business Week, others are resisting tougher laws because they fear for the privacy of their law-abiding customers.
You'll find this kind of fascinating,

in-depth reporting every week in Business Week, the only newsweekly of business.

That's one of the reasons why we have two million more readers than any other business magazine.

# To Toshiba on and 1.1 shares of a new series of Joint Venture

TOKYO - American Telephone & Telegraph Co. and To-shiba Corp. are negotiating a joint telecommunications venture in Japan, a spokesman for the Japanese company said Wednesday.

The spokesman said talks were going on, but that he could not comment on them. He said AT&T might broach the subject at a news conference scheduled for March

Asahi Shimbun, the daily newspaper, and the Japan Broadcasting Co. earlier reported that the two giant companies were planning to create a joint-venture concern in which Toshiba would market such AT&T products as digital telephone switching equipment in Ja-

The newspaper said AT&T also was considering similar joint ven-tures with Ricoh Co, and Olivetti

The reports come a month before Japan's telecommunications monopoly. Nippon Telegraph & Tele-phone Public Corp., goes public, U.S. companies have been pressing for access to the Japanese market which could mean hundreds of millions of dollars in new business. The Japanese government is

working out new regulations to govern Nippon Telegraph & Tele-phone's move into the private sector, and the Reagan administration has complained that the rules un-der consideration may discriminate against foreign manufacturers. The current U.S. share of Japan's

\$6-billion-to-\$7-billion telecommunications market is about \$130 million, whereas Japan last year sold about \$2 billion worth of telecommunications equipment in the

# AT&T Talks Chrysler Says It Plans Small Car to Compete With GM Saturn

By James Risen Las Angeles Times Service

DETROIT — Chrysler Corp.'s chairman, Lee A. Iacocca, has said that Chrysler would build a new. high-technology small car before General Motors Corp.'s highly oublicized Saturn subcompact goes into production.

The pledge move came less than z week after Mr. lacocca had said that Chrysler would triple its imports of Japanese-built small cars in response to the Reagan adminisyear of limits on Japanese auto im-

#### Pan Am, Union Schedule Talks

United Press Internation NEW YORK - Pan Amerian World Airways and striking mechanics were to meet Wednesday in an attempt to settle a two-week walkout that has reduced Pan Am's flights to about 30 percent of normal lev-

Officials of the Transport Workers Union, representing the 5,800 mechanies, said "every effort" would be made to comply with a directive by a U.S. federal mediator, Robert J. Brown, for the meeting. The two sides have not met formally

since the strike began Feb. 28. Pilots, engineers, clerks and flight attendants honored the mechanics' picket line until last Thursday when pilots and engineers decided to resume work. Pan Am said Wednesday that it would soon increase operations to 52 percent of normal.

Project," would develop models duce and market up to 450,000 with a new product before Saturn," with more advanced technology front-wheel-drive subcompact cars said David Cole, director of the than anything now offered by the a year.

Standard's acquisition in the third quarter of ICL PLC, a British com-

puter manufacturer.

ter, the company said,

that Chrysler's proposed "P-car," a U.S.-built subcompact schedule to be introduced late in the 1986 model year, would be converted into a more expensive compact model that would not compete directly with Japanese imports.

#### Ford Profits Shared

Ford on Wednesday distributed \$360 million in profit-sharing checks to an estimated 170,000 hourly and salaried employees, United Press International reported from Dearborn, Michigan. The pool reflected Ford's 1984 domestic profits of \$2.39 billion.

Last year, the profit-sharing pool was \$69 million. The profit-sharing plan was negotiated in 1982

#### Peugeot to Build Cars in China

PARIS — Automobiles Pengeot, subsidiary of Peugeot SA, said Wednesday that it would sign a 600-million-franc (\$58.5-million) agreement Friday for the production of Peugeot 504 pickups and station wagons near Guangzhou, China

The joint venture, Guangz-hou-Peugeot Antomobile Co., will have an initial capital of 240 million francs, 46 percent of which will be provided by Guangzhou Automobile Manu facturing. China International Trust & Investment Corp. will provide 28 percent, Automobiles Peugeot 22 percent and Banque Nationale de Paris 4 percent

Full production will start in two and a half years, Jean Boillot, chairman of Automobiles Peugeot, told reporters.

#### Textile Machinery Quarrel Frays Japan-Mexico Dealings

(Continued from Page 9)

spondence leading up to what has become a \$60-million lawsuit by Mr. Alkon against the Japanese company tend to support his assertion that what he received was not what he ordered.

Mr. Alkon's plant, as a result, has been shut down for three years, and most of his staff of 200 workers has been laid off - an expensive proposition in Mexico, where generous severance pay is required by law. He estimates that his company has lost more than \$30 million. The Mexican government, which

is finding itself increasingly embarrassed by the case, certified after an inspection of the equipment last year that "the machinery that is installed in Alkon Textil Sa de CV, does not correspond to the reference contracts, nor to the permits authorized by the Secretary of Commerce and Industrial Devel-

A U.S. textile expert brought in by Mexico's National Chamber of the Textile Industry, Pasquale Bel-mont, pronounced the equipment "used, defective and not appropri-ate for the ends specified in the

Mr. Alkon said he suspects that he was delivered a less sophisticated plant after Mitsui discovered he was planning to export his fabrics, thus competing with Japanese textile producers. He is certain, for example, that

make the foam backing for the fabric actually is a dough-kneading machine. The original cost of textile equipment was \$15 million. Transportation, Mexican taxes and duties brought the installed cost to about \$3.5 million, according to Mr. Alkon.

**NYSE Highs-Lows** 

**New Stability Reported** In Hong Kong Property

Reuters

HONG KONG — Conditions in the Hong Kong property market have strengthened and are more stable after turning the corner last year, according to a report Wednesday by the stockbroker Hoare Govett (Far East) Ltd.

Factors underlying the turnaround include an economic upswing, falling interest rates, restoration of affordable rents and prices, and removal of political uncertainty about the territory's future, it said. All these factors have led to a recovery that has cut into a large amount of vacant property, it said.

The review said price increases of 20 percent to 25 percent are likely during 1985 in sectors where shortages are either already evident or expected. They are identified as prime office buildings in Kowloon and Hong Kong Island, medium-size residential units and top-grade urban factories.

**BAe Share Offer** Set for Early May

LONDON — British Acrospace
PLC said on Wednesday that the
planned public offer of the government's stake in the company along
with the raising of more equity capital is expected to take place early
in May ital is expected to take place early in May.

It also intends to make the issue payable in two installments. The company has not decided the exact amount it wants to raise, although its equity base will not be expanded by more than 25 percent. The British government's plan to sell off its remaining 48.4-percent interest in BAE was amounted in mid-lanu-

BAe was announced in mid-Janu-Existing shareholders will be given preferential rights to subscribe to the new shares issued by the company, subject to legal restric-tions on investors overseas, but will not have preferential rights to pur-chase the government's shares. Em-ployees will have rights to preferen-tial allocations of up to five million U.S. Treasury Bill Rates oour Reader March 12

## **U.S.** Universities Seek Profit in Research Parks

NEW YORK - Hard-pressed for funds and eager to support more research, scores of universi-ties around the United States are developing corporate research parks in their backyards.

Yale University, the University of Missouri at Kansas City and the Polytechnic Institute of New York are among those following the suc-cessful lead of Princeton Universi-ty, with its Forrestal Center, and Stanford University, with its Research Park.

Douglas R. Porter, associate di-rector for research at the Urban Land Institute, a private consulting group based in Washington, said 31 universities were developing re-search parks. Fifteen or so more, he said, were in the "initial investigation phase," while another dozen or two "are being very quiet about their plans or thinking to them-

"There are hundreds of office parks across the country, but the interest and involvement of universities is a new phenomenon that is gaining momentum," he said. Mr. Porter warned, however, that there was no guarantee that other schools would fare as well as Princeton and Stanford, mainly because of com-

The attraction of such developments for universities is the money they can earn as landlords or on equity in new companies locating at the research parks. For businesses, it is the easy access they gain to faculty, graduate students and research laboratories.

The Siemens Corp., for example, decided to locate its research and technology laboratories division in the Forrestal Center because Princeton is the mecca of research in the East, said Dr. Carl Zain-inger, executive vice president. "Here we can find the kind of peo-

ple we need," he explained. Other corporations that have chosen to locate in such research parks are Xerox Corp., Interna-tional Business Machines Corp.,

Syntex Corp. and Exxon Corp.
This surge of entrepreneurial development is the result of a variety of trends in academia, industry and community life.

For the private sector, the high-technology revolution has created a demand for more research in general, making access to faculties, lab-oratories and other resources of al, making access to faculties, lab-oratories and other resources of universities increasingly important. develop research parks with univer-

Universities, faced with tighten-

the years for the day when expan-

sion — new classrooms, dormito-ries, and athletic facilities, for in-

Moreover, university communi-ties are considered good places to live. With high-technology industry being very different from industry of the past, Mr. Porter said, factors such as access to markets, raw materials or high-volume transporta-tion do not have the same urgency they once did. Instead, companie are paying more attention to quali-ty-of-life concerns: a pleasant envi-ronment, affordable housing, rea-sonable commuting, good schools and a range of cultural and recre-

ational activities. "The locational criteria for this new generation of companies differs dramatically from traditional industrial concerns," said Richard A. Kahan, a former president of New York State Urban Develop-

stance - would require its "We had about 325 acres that was once used for some experimental agricultural research, but had become less and less desirable for this function," said Wayne McGown, special assistant to the chancellor at the University of Wis-consin at Madison. "It was an is-land of relatively unused land in an land of relatively unused land in an

ine some alternatives." Closer ties with industry, many schools have also concluded, is one The dollar's sharp rise has made him much more cantious about in-vesting on Wall Street because "its fall could kill an otherwise sound way to help stay the flight of professors to the private sector, with its typically higher salaries.

investment." Mr. Brandstrup-An-In addition, jobs are usually credersen says he is only recommending a research park, a factor that is insist. In his opinion and that of the bank's economists, the long-term drawing many cities and towns into the development process. And He said any buying is focused on since few schools can afford to de-

ventures with public agencies of with private developers. Princeton, which was among the

earliest to recognize the potential for an office park, expects its earnings from the Forrestal Center to exceed \$1 million annually within a couple of years. The 1,604-acre (649-hectare) complex has attracted 50 companies and research insti tutions, employing more than 5,000 people. The university has already recouped its entire investment of about \$10 million. And a \$100million expansion, a commercial complex offering restaurants, retail shops and other amenities, is now on the drawing boards. It rents the land in its center, under 50-year prepaid leases, for an average of \$250,000 an acre.

The Stanford Research Park, which has attracted 50 tenants on its 660-acre site since starting development in 1951, is providing the university with income of \$2 million a year. There are 26,000 people

employed at the park.
Yale, Olin Corp. and the city of
New Haven have joined together to
develop a park on an abandoned Olin manufacturing site, next to the school, that once supported 15,000 jobs. The joint venture, called the Science Park Development Corp., has spent \$10 million on the project so far and \$40 million more is ex-pected to be invested over the next

five years.
"The park was conceived as an economic revival project," said Matthew Nemerson, a vice president of Science Park Development, who said that 400 jobs had been created so far. "The idea is to use the academic and research assets of Yale, to capitalize on its reputa-

tion, while relying on the financial backing of others." Ofin has contributed 80 acres of Universities, faced with tightening budgets and declining enroliments, are casting about for new
ways to support and enlarge their
research activities. They are finding
that one of the few potential income-producing assets they have
left is land. Most schools, in fact,
have extensive property holdings,
which have been held in trust over
the years for the day when expanland and three buildings as well as some operating funds; Yale shares all of the resources of its campus, and the city has created a \$1-million venture capital fund to help small companies that will occupy the city. the site. The state of Connecticut has also provided about \$2 million

In contrast, the University of Missouri at Kansas City, has decided to collaborate with a private developer, Mr. Kahan of the Continental Development Group.

"We looked at different development options, but decided that there was no way we could go it aloue," said George A. Russell, chancellor of the university. "De-velopment isn't our business."

In fact, only a handful of schools have decided to go it alone. Some schools, such as Princeton, have employed a management company; others, such as the University otherwise urbanized area, and when we began to receive a string of overtures from developers it seemed the time had come to examof Wisconsin or Purdue University. have created a university-affiliated

foundation for the purpose. Success, however, has been hardwon, even by schools with considerable resources and prestige. And

"Some will take off, but most are going to limp along," said Dr. George Bugliarello, president of

ations," said René Montes of Guatemala, the

conference chairman. Price levels and price edjustments are for both sides fundamental." Cocoa economists said the failure of the neectiations probably would not unduly concern the world's two largest producers, the lvory Coast and Brazil, but would cause problems for

other countries, such as Ghana, that still rely on cocoa for most of their foreign exchange in

# The editors of the International would like your

Have you spent at least five minutes reading this copy of the International Herald Tribune? Will you help the editors by taking part in a readership research project?

The Trib is written for people like you living in 164 countries round the world. The editors want to know how well it is serving your needs and how useful and enjoyable you find the contents.

Your opinion is important even if you see the paper only occasionally. The best means we have of identifying you and learning about your opinions, is by reaching you through this letter today.

We would like to send you a simple questionnaire. It will take about fifteen minutes to fill out. It will ask about your likes and dislikes. There will be space for any comments you would like passed on to our editors.

If you would like to help, just fill in the form below and send it to our research consultants at the address that is indicated below. All replies to this and to the subsequent questionnaire will, of course, be treated in complete confidence. A small thankyou gift will be sent to those who return that subsequent questionnaire.

Thank you very much for your assistance.

TO GET RICH IS GLORIOUS: China in the Eighties

By Orville Schell. 210 pp. \$15.95. Pantheon, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by Daniel Southerland

T HIS little book on a big subject happens to L contain some of the best recent writing on China. Orville Schell has an eye for color, irony and nuance which is extraordinary. By vividly describing the Chinese whom he meets and their hopes for a better life under an increasingly decentralized and decollectivized economy, Schell takes some of the mystery out of China and humanizes it. This is all to the good. As one China scholar, Harry Harding, of the Brookings Institution, has noted, American artitudes toward China have undergone regular cycles of romanticism and cynicism which cloud our vision of that huge nation. Or as Schell himself describes it, to the West, China has been "anything from a billion red ants threatening to destroy the world to a billion staunch socialists, the only hope for its salva-

If Schell is correct, many of us may currently be in danger of romanticizing, or idealizing, China's recent economic reforms. The ABC China's recent economic reforms. The ABC News "Nightline" program earlier this winter called the reforms China's "new capitalism." Editorial writers, meanwhile, delight in arguing that China is "going capitalist." But Schell reminds us of how complicated things really are, pointing to some of the mines that could be lying there, waiting to explode as China's economic planners blaze new experimental trails. The author provides a counterpoint to the "Oh; how wonderful, how exciting!" current in American thinking about China, which coexists with an equally forceful "Oh how terrible!" school of thought.

As Schell puts it, "Western dreams of China, As Schell puts it, "Western dreams of China,

whether of business or revolution, have fallen terribly short of their hoped-for realization. Yet the dreaming goes on — and once more, as in the 19th century, the West, from vantage points like the Great Wall Hotel (in Beijing), is dreaming of China as an endless sinkhole for Western capital and goods; a trading partner par excellence, a billion customers just waiting to drink our Cokes, wear our jeans, buy our

factories, power plants and weapons."

The author correctly asserts that "it is all too easy to forget that what is actually out there is a relatively impoverished country that has his-

torically been either economically self-sufficient or unable to eke out the money to buy an appreciable amount of Western goods: a county that even in 1981 had to back off from its massive modernization program, which over ministed it to purchases from abroad. Historin this sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past Western in the sense is not a source of the past western in the sense is not a source of the sense in the sense is not a source of the sense in the sense is not a source of the sense in the sense is not a source of the sense in the sense is not a source of the sense in the sense in the sense is not a source of the sense in the sense in the sense is not a source o the past Western dreams, like Chinese dreams,

have more often than not been disappointed. Schell does not deny that Deng Xiaoping's reforms have brought some dramatic economic progress, including "a surge in over-all agricultural production." But he wornes about an inequitable distribution of the gains. He fears that free market practices may cause a decrease in grain production, an increase in grain prices for city workers, and uncontrolled inflation. The author shares the concern of William Hinton, an American farmer who worked in China for many years and who now fears that in their eagerness to "privatize," the Chinese are throwing out everything which was of value from the past, including the collective mainte-nance of dam, irrigation, and flood control

Schell is also concerned that in their zeal to acquire Western technology and the latest in Western luxuries, the Chinese are also, inadvertently, allowing the development of an underworld class of young opportunists, speculators and criminals. Schell describes well those among China's youth who are unemployed or who have lost confidence in the communist system. One young hustler whom he meets in a private restaurant in Beijing boasts that for cold cash, "We can get you anything you want. Clothes from Hong Kong, tape recorders, cam-

coines from Hong Kong, tape fectiones, cameras, watches, televisions, radios."

More poignant is his account of a Saturday night dance sponsored by a Taishan county labor-union organization. Schell ends up chatting with a Miss Wu, who asks him to teach her how to dance. She tells him that she loves to practice dancing and listen to Western population in the evening as a diversion from her music in the evening as a diversion from her boring job in an electrical wire lactory. Before long every youth in the room is looking at Schell and a European friend "with great intensity, as if they expected us to momentarily unlock the riddle of the universe."

"The open door policy may have meant the mastering of Western science and technology to China's leaders, but to these Taishan youths craving a little foreign culture and glamour, it meant learning how to dance and having some

The dancing had its limits. When Schell's European friend burst into a jitterbug and some of the bolder Chinese boys began to laugh and clap, a cadre in a gray Mao suit sprang into action:
"He jumped to his feet, walked over to the performance, and motioned my friend to cease

with a palms-forward fluttering gesture, the kind someone makes trying to dissipate a bad . But on one important point, let the reader be

warned. Schell's writing is so engaging that one might be tempted to think that this is the whole story. China is so big and moving so fast that it's doubtful any one writer can grasp the whole. And readers should be aware that there are more optimistic views concerning China's economic future. But this slender book is a quick and readable introduction to today's China, even if not the final word.

Daniel Southerland has just become Beijing bureau chief for The Washington Past.

an awful lot because they kept giving me the ball at the end of the The Atlanta coach, Mike Fra-

tello, said the Celtics fed the ball to ird's 60 points matched the sea-high scored by Bernard King helped Kevin McHale set a team

#### **SPORTS BRIEFS**

#### ew Orleans Group Buys NFL Saints

EW ORLEANS (AP) - Automobile dealer Tom Benson and a p of at least eight other businessmen have signed a contract to buy. New Orleans Saints for \$64 million from John Mecom Jr., who ght the National Football League franchise for \$8 million in 1967. he purchase price was about what the Dallas Cowboys sold for last although the Cowboys are perennial championship challengers and Saints have never had a winning season.

enson said the sale was contingent on four things; approval by NFL ers, a virtual donation of nearby state land for a training facility, a 40lease on the Superdome and removal of taxes on all events at the ium, which has been a drain on the state treasury since it opened in i. Benson and the governor of Louisiana, Edwin Edwards, who was ent at Tuesday's news conference, said there appeared to be no slems with getting those points worked out.

#### Y. Signs Mets, Who Sign Strawberry

EW YORK (AP) — Mayor Edward I. Koch said the city has agreed send \$36 million to renovate Shea Stadium and that the New York s will extend their lease there for 10 years, to the year 2004. : Florida, the team announced that outfielder Darryl Strawberry had ed a multiyear contract with the potential of earning nearly \$8 million

the next six years. cause one-third of the money will be deferred, a team official said. wherry, who turned 23 Tuesday, will receive \$500,000 annually for

#### w Mexico Wins NIT Opening Game

LBUQUERQUE, New Mexico (AP) — Forward Johnny Brown 20 points and New Mexico's basketball team, by holding Texas 4 to one field goal in a seven-minute stretch early in the second half, its opening-round game of the National Invitation Tournament, 80ere Tuesday night. Texas A&M played without its leading scorer, ir guard Kenny Brown, who quit the team Monday.

#### seball Owners Predict Huge Losses

LANDO, Florida (AP) — Major-league club owners on Tuesday cted a future "deterioration" of baseball's finances, with operating s that could top \$150 million by 1988, if management and the ars' union cannot agree on a plan "to safeguard" the game.

hile full financial statements were not available from all 26 clubs for , the management report, presented during a short bargaining on, said 18 of 26 teams showed 1983 operating losses totaling about million, an average of \$2.5 million per club. Of the eight franchises ing profits, five reported gains of less than \$1 million. report said 11 clubs had returned financial statements for 1984,

of which showed losses of more than \$27 million, an average of more

#### BA Champion Quiroz to Meet Olivo

NAMA CITY (AP) — Francisco Quiroz will defend his World 1g Association light-flyweight championship title for the first time in 29 in Miami against Joey Olivo of the United States. The title bout been postponed twice, both times because of problems between 12, a Dominican who lives in Venezuela, and his manager, Rafito

"That's team camaraderie," Fratello said. "It's infectious, and everybody wants to be part of it."
"He was unreal," the Hawks'
Dominique Wilkins said of Bird. "I was all over him, bumping him. He hit shots other guys couldn't even get out of their hands."

In other games it was Houston 131, Denver 129; Indiana 109, New Jersey 108; Phoenix 123, New York 119; Kansas City 120, Portland 114; Chicago 111, Detroit 110; Los Angeles Lakers 123, Utah 108; and Golden State 145, San Antonio

The Hawks, led by Wilkins's 36 points, kept the game close most of the way. But early in the third quar-ter a lay-up by Dennis Johnson gave the Celtics the lead for good at

After leading by 11 at the end of the third period, Boston took its largest lead, at 108-93, on two field goals by Robert Parish with 8:30 left in the game. Atlanta then out-scored the Celtics by 12-2, with Wilkins scoring eight of those to close to 110-105 with 4½ minutes

But that was as close as the Hawks could get. Bird scored the next six points for a 116-105 lead, and as a finishing flourish scored Boston's last 16 points.

Bird made 22 of his 36 shots and 15 of 16 free throws on route to breaking McHale's team record. Bird also improved on his personal career-high of 53 set in 1983.

Bird had 23 points at halftime, when the Celtics led by 65-58. He scored 19 points in the third quar-ter, which ended with Boston ahead, 100-89. The 6-foot-9 forward, the most valuable player in the NBA last season, then got 18 in the final period to keep Boston in

Johnson had 15 points for Boston, while Parish had 12 and a game-high 19 rebounds. Eddie Johnson added 26 points

for the Hawks.

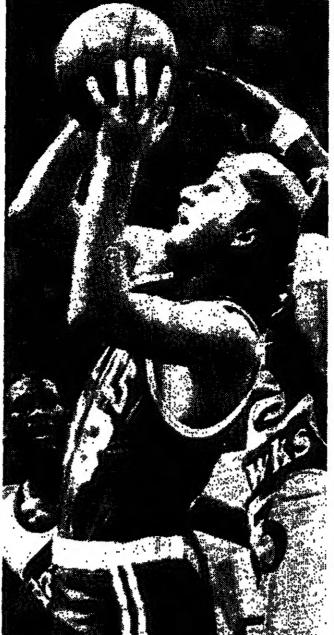

A sellout crowd 10,079 attended the game at the University of New Orleans' Lakefront Arena. It was the 10th of 12 "home" games the Hawks have scheduled in New Orleans, with most of the games having drawn fewer than 4,000 fans.

"I didn't think that I would like this gym," Bird said. "But I had a good feeling from the first quarter on, even though it was awfully Both Bird and Jones kidded team bus. To me, the most impor-

McHale about losing the team tant thing is winning the hockey scoring record after holding it for game. If you get points, it doesn't soch a short time. "It was Kevin's fault, because he should have gotten 60 or more last time." Bird said. "Plus, he committed a foul at the end of the game

that gave me a chance to get two more right before the buzzer." "So much for Kevin McHale,"

Basketball

Larry Bird worked through a thicket of defenders in the first quarter to score two of his 60 points against Hawks.

ST. LOUIS - After becoming

the fourth player in New York Is-

landers history to score 100 points

in a season, Brent Sutter played down the achievement Tuesday

night and emphasized the impor-

tance of his team's 6-5 victory over

the St. Louis Blues in the National

Hockey League.
"It's nice," he said more than

once as other players ran for the

There are six Sutter brothers playing in the NHL. Each has carned a reputation for playing to

win and not letting personal

achievements outweigh the team's.

Brent Sutter, who got two goals and two assists, said he hoped this

victory indicated a run for the playoffs. The struggling Islanders, after

# Guerrillas' Threats Curtailing Northern Ireland Sports Meets

The Associated Press

guerrilla threats, sportsmen from ern Ireland and unite the province the British mainland are refusing to compete in Northern Ireland, forcng a number of events to be can-

Bowling, wrestling and badmin-ton tournaments already have been called off and, last weekend, several leading British athletes announced they were considering boycotting the national track and field championships at Antrim in

The reason is threats of attack by the Irish National Liberation Army, an extreme breakaway faction of the Irish Republican Army, in an area that has been relatively untouched by 15 years of violence between Catholics and Protestants.

In the 1970s, track and field, soccer and rugby teams were among those that canceled trips because of the "troubles." But since then, sports in the province had returned to comparative normality, and au-thorities have nurtured sports as a bridge between the feuding com-

According to Irish press reports, however, sports officials now are worried that the British-ruled province again could become a "no-go rea" for British and international

Despite the sudden resurgence of fear in some quarters about playing sports in Northern Ireland, plans for an international sports festival in June are going ahead.

Nine nations, including the United States, are scheduled to join British and Irish teams in a variety of sports ranging from karate to padminton, and culminating in a star-studded track meet at the Mary Peters Stadium in Belfast on

foot blast over Millen's shoulder.

membership is predominantly Catholic, is fighting to drive Britain LONDON - Scared off by out of primarily Protestant North-

> with the Irish Republic. Last month, the INLA planted a bomb close to Belfast's Windsor Park soccer stadium where England was playing Northern Ire-land in a World Cup qualifying

> The bomb went off an hour after the game and injured no one, but the INLA warned that, in the future, all visiting sports teams from the British mainland would be in danger. Next time, the organization said, it would bomb to kill.

> The threat had an immediate impact. The British amateur wrestling championships, due to be held for the first time in Northern Ireland in May, were called off.

Then, the Scottish Badminton Association decided not to field an under-18 team to play an all-lre-

The British Isles indoor bowling championships, scheduled for Belfast next year, have been switched to the British mainland, and now there are growing doubts about the national track and field champion-

"I don't mind admitting that the thought of competing at Antrim
"The advice we have received is
terrifies me," said the British track that our athletes will not be at star, Todd Bennett, who recently

broke the world indoor 400-meter

"Now that the INLA have made their views known, it could change the minds of a lot of people. We only have one life, and it only takes a small bomb to end it," Bennett was quoted as saying.

Ade Mafe, 17, a sprinter, said he, too, was considering withdrawing from the Antrim championships. You don't know whether they'll try to pick off one or two or blow up a whole bus," he said. "There's alot of feeling among the athletes about not going."

Les Jones, secretary of the Northern Ireland Amateur Athletic Association, said "tough security measures" were planned for the championships. He played down the guerrilla threat, saying there were no incidents the last time the ern Ireland, in 1981, even though anti-British sentiment was running higher then than now.

About 700 athletes are expected for what traditionally is the curtain-raiser to Britain's outdoor track season. Nigel Cooper, secre-tary of the British Amateur Athletic Board, said he did not know how many competitors would choose not to compete, since invitations had only recently been sent.

The advice we have received is

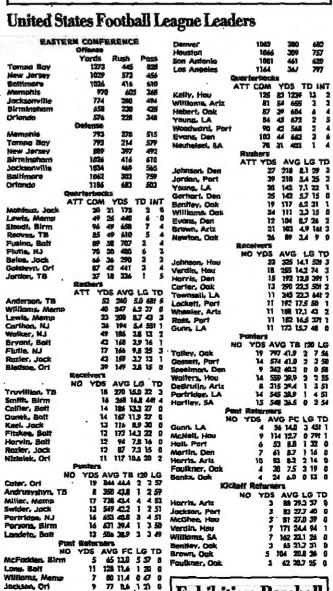

New Jersey's Dave Lewis rode Scott Arniel off the puck in scrainble in front of the net as the but goalie Billy Smith turned them New York power play continued, back with some sliding saves, especially in the final minute when Milbert and the final minute when Milbert and the final minute when Milbert for St. Louis. The len was pulled for an extra attacker.

Tuesday's early going, but Arniel's goal at 13:59 of the second period put Winnipeg ahead for good as the Jets posted a 6-3 victory in the National Hockey League contest.

#### ART BUCHWALD

### Tough Nuts to Crack

WASHINGTON — Does the to carry her to the supermarket on his back." most psychotherapists mean that there are more mentally deranged people here than anywhere else? The answer is probably yes.

Dr. Arnold Frisher, a noted psychiatrist who has been practicing here for 40 years, and only takes

the toughest that something happens to peo-ple after they stay in Washington awhile.

He said, "To put it in profes-sional terms, 50 percent are nuttier than fruit-

Buchwald "How do you account for it?" "Pressure, power and politics. Although most of them are normal people when they come here, it doesn't take long for them to lose all sense of reality. Let me give you an illustration. I have a patient who works for the Office of Management and Budget. He makes \$28,000 a year. Every time he comes to see me he says he has just chopped another billion dollars out of a government program. Then he bites his fingernails.

"Would that make him crazy?" "No. But on each visit he claims he's brought the money with him and wants me to put it in my safe so Congress can't get their mitts on

"It sounds like he's suffering from exhaustion."

"That or guilt," Dr. Frisher said. "Six months ago he took a wheelchair away from his 80-year-old mother because he said she wasn't entitled to it on Medicare." "Why would he feel guilty about

"She calls him every morning and tells him not to worry about her because his father has offered

#### Chinese Find Habits Die Hard

BELITNG - More than 200,000 people have been fined here this year for spitting, the Beijing Evening News said Wednesday. The government is trying to curb the habit, but even Deng Xiaoping, China's top leader, keeps a spittoon nearby when receiving guests.

his back."

What other troubled patients do you see?"
"I have a senator who took \$5

million from political action committees in the last election, but still believes he's his own man. Then there is a secretary of education who has a phobia about college kids, a U.S. Justice Department attorney for civil rights who loathes civil rights, a newspaper reporter who behaves like an animal, a lobbyist who claims to have 20 congressmen sewn up in his pocket, and a CIA official who has to continually wash his hands every time he testifies about Nicaragua "Is that it?"

"No, I have this high official in the White House who maintains he has a mandate to spend a trillion dollars on new weapons to keep the

"That wouldn't make him gonzo. The White House did win 49

"My patient doesn't claim he has a mandate from the people — he says he has one from God."

"Haven't you ever had patients who talk to God?"

Yes, but I have never had one who told me God wanted him to spend a trillion dollars. That's

"At the same time, the way things seem to be going, a trillion dollars isn't too much to invest for security on Earth."

"My patient doesn't want to spend it on earth. He wants to spend it in the sky." "How is he going to do that?"

"He doesn't know. That is why he says he comes to me. He wants me to find the answer before people say he's flipped out."
It sounds like a hopeless case.

Why don't you fire him as a pa-

"Because I think I have the solution. If I could hook up a network of lasers to 10 hydrogen bombs and explode them just as the moon passed over the Soviet Union, I could create a nuclear winter, which would negate a first-strike capability, and then the Russians would come to me and say, 'Ain't going to go to war no more, ain't going to go to war no more, ain't go-i-n-g to go to war no mooomme."

By Michael Kernan Washington Post Service
WASHINGTON — In 1975,
Doug Scott became the first Englishman to climb Mount Evcrest. He spent a night, without sleeping bag or oxygen, 300 feet meters) from the summit the highest bivouac in history. He is one of the three or four greatest alpine-style climbers in the

On 19 expeditions to the Himalayas, he has forged new routes up many peaks. He has climbed in every mountainous continent except South America, has done Yosemite's El Capitan "four or five times" and has written a book about the epic conquest of the southwest face of Tibet's Shishapangma, more than 26,300

He visited Washington to promote "The Shishapangma Expedition," which he wrote with Alex McIntyre, a brilliant climber who was killed two years ago, at age

28, by falling rock on Amapurna.
"Three of my friends have died just after writing books," Scott said. Scanning a page of portraits of the 30 climbers on the Everest expedition, he pointed to "this one, this one, this one, this one," picking out nine men who have died since

Death is always close in Doug Scott's world. "Every trip, something happens. Two weeks ago, on Vancouver Island, I was sliding down a face and a rock bounded down and hit the rope. I didn't know it. Afterward I found one strand cut nearly through. There's always something like

Death takes a different form now than it did in the old days, when a Himalayan climb meant dozens of Sherpa guides, elaborately stocked camps all the way up and a network of fixed ropes. Today, with nearly all the great peaks conquered (except Namcha Barwa, 25,700 feet, which the Chinese are reserving for them-selves, having failed three times), mountaineers try for new and harder routes, as well as faster times, forever narrowing the safe-

Climber Doug Scott: Death is always close.

are going up the Himalayas al-pine style; no fixed ropes, no masses of equipment, no series of fixed bases, it is, Scott said, more like a commando raid than the army invasions that early Himalayan attempts resembled.

"People used to get killed in avalanches and falling off the mountain, things like that. Now we have more experience and bet-ter technique. Now they die of edemas, lung or brain edemas caused by going up too far too fast. It has to do with the alpine style - you have to climb faster because you carry less food."

Not that the early climbers were not just as committed and courageous as the new breed. Fixed-rope climbing can be dangerous, too, since one might have to pass a hazardous spot a dozen times in relaying supplies up the mountain, while alpine climbers What this means is that they would pass it only twice.

"Ever since the southwest face of Everest was done," said the quiet, bespectacled Scott, modestly using the passive form, "it was realized that if you had enough men, materials and money, and a break in the weather, you could climb anything. And when I spent the night on Everest, I realized I can go anywhere I

Future climbing in the Himalayas, he said, will concentrate on steeper faces, ever higher on the massif. "Up to now, no significant technological climbing has of yourself."
been done much above 24,000 He was on feet. There are routes on K2 and

Makahı ştill to be done." Scott has made three attempts at one of the "unclimbable" routes up K2. "I want to try K2 again in '86. But it's getting so complicated. I already had to send them \$2,000 in advance for panse, the distances, you can see royalties. When you do a climb in Nepal they send you a 48-page be there."

has become so popular that mountains have to be booked, and frequently one runs into oth-

book of rules." Mountaineering

The new trend is to bring friends and family along on Himalayan climbs. An expedition can set up a base in a relaxed atmosphere, try two or three warm-up climbs - also in the alpine tradition — and gradually adapt body and mind to the altitude, where the air contains onethird the oxygen most people are accustomed to.

"I'm right into the thing of hav-ing women in it," Scott said. "I've lost so many friends in the last few years, it didn't stop me from wanting to go but it did make me think. I take risks still, but I'm not blinkered by ambition. Wom-en help with this, I think. They help to give some balance, so the lads don't go off the deep end with their aggressiveness." A retired teacher, the 43-year-

old Nottingham native is married to a teacher and has a 21-year-old son. Money for expeditions comes from lectures, articles and the occasional construction job. Scott is a vegetarian ("You adapt to altitude faster, meat seems to take the liquids out of the body") but only last year did he give up smoking. The lungs are the most important thing to a climber, he

He does not bother to mention the conditioning that enables him to dangle by his fingertips on a rock face or spend the night in a hammock swing from two pitons a few thousand feet in the air. "I do a rock climb at least once

or twice a week, preferably every day. Six or seven hours up a rock gives you a great feeling. You eat and sleep better. It takes you out He was on his way to try some

peaks at Banff in the Canadian Rockies, and later planned to re-turn east to climb Mount Washington. But always, the Himala-yas are waiting for him. "I can't tell you - when you

get up there in the sky, the exeverywhere, everywhere. Just to

# Tuning Up for Bach

time to celebrate the 300th anniver-sary of Johann Sebastian Bach's insistence and aid of Carter, At birth and the first presentation in end of 1978, Sadat and Begin and modern times of 33 recently discovery modern times of 33 recently discovered Bach chorales. The restored organ's replacement value was put at \$750,000 by Joseph Dzeda, who, with his partner, Nick Thompson-Allen, removed each of the 34-year-old instrument's \$460 nines. old instrument's 3,691 pipes, most of them metal, and washed them in hot, soapy water. They also refinished the organ's big wooden pipes and restored the rest of the instrument. More than 1,000 spectators are expected in New Haven, Connecticut, on Sunday for the national premiere of the Bach chorales, to be played by the Yale organist Charles Krighaum and the Harvard organist John Ferris. The Voice of America will broadcast the concert to Europe on March 21, the 300th anniversary of Bach's birth. Christoph J. Wolff, chairman of the music department at Harvard University, recently found the 33 Bach chorale preludes in an obscure 18th-century German music manuscript in the John Herrick Jackson Music Library at Yale.  $\mathbf{D}$ 

Television viewers have voted a New York model the most beautiful girl in the world. Pamela Catherine Gidley, 19, was selected from among 21 contestants in the second annual "most beautiful girl in the world pageant" broadcast from Sydney. Maristella Silva Grazzia. representing South America placed second; third-place honors went to Natalie Anffret-Lascoumes of France, Gidley was awarded more than \$100,000 in cash and prizes.

Former U.S President Jimmy Carter is the first American to receive a peace award from the World Methodist Council. A Methodist spokesman said Carter was chosen to receive the World Methodist Peace Award because of his activist role, as president and private citizen, in seeking solutions to international crises. The award, given when the 15 officers of the World Methodist Council agree an individual deserves it, was presented at Emory University, where Carwife, Mahel, and rarely ter's policy center and presidential library are being built. President million to charity since he sell.
